- 04 Estimated Investment

Category Landscape

An Isobar
Company

+

Custom cake industry is growing

DEMAND IS RISING

- + Demand is increasing significantly across the globe as they are instant, accessible, and delicious
- + Dessert cakes are expected to be the fastest-growing segment due to the increasing demand for desserts in ceremonies and dinners
- + Consumers have increased purchasing occasion specific cakes, expanding the market YoY
- + Younger customers haven't yet engaged significantly, once they establish households of their own this is expected to change
- + Convenience and indulgence continue to drive consumption

GROWTH IS PROJECTED

- + Impact of COVID was felt on the retail sector, but is expected to recover as the retail bakery market is expected to grow by more than 7%
- + Consumer lifestyle changes, a rise in disposable income, and availability of bakery products, and arise in urbanization is growing the market
- + Market share for innovative and healthy products has been rising
- + Specialty retailers are the largest product segment and is projected to grow over the next few years

2021 TRENDS

- + Consumers are willing to pay a premium for personalized products
- + These same consumers are willing to share data in return for more personalized customer service and products
- + Consumers are seeking fresh products over processed foods, specifically whole-grain, multi-grain and trans-free fat
- + 49% of Millennials say that cakes or pastries with multiple colors and visually interesting are premium
- + 74% of NA consumer want to try new and exciting chocolate cake experiences
- + Interest in seasonal fruit flavors will continue

[Mintel](#) Instore Bakeries February 2020 Report

What We Heard

+

YOU'VE SET AN AUDACIOUS GOAL:

+7% Same Store Sales YoY

By our estimation, that's about +\$24.6MM in incremental revenue among same stores.

We know digital won't be the only driver in meeting that goal, but we believe the right digital plan executed with DEG as your trusted partner, we can meet and *exceed* that goal.

MATH

- 4.8MM Records/Email Sent x 1 Email/Week Cadence
- Assume 50% are grossly unengaged = 2.8MM records
- Assume \$39 average ticket value
- What if we can get just 10% of your assumed engaged audience to buy just *one more time* next year?
- +\$6.1MM Incremental

MATH

- The average online order abandonment rate is around 70%
 - Same Stores LY did about 1.4MM Online Tickets for a total of \$55.6MM
 - That means for every three online tickets, seven others abandoned
 - That's an estimated total of 3.2MM orders (or \$127MM) abandoned!
-
- A strong performing identity configuration can recognize up to 50% of all users – including anonymous users – or 1.6MM of the abandoned orders
 - A strong performing abandonment journey can recapture 7% of all abandoned, contactable/reachable orders – or 112K incremental orders
 - At a \$39 online AOV, we can recapture up to \$4.3MM in otherwise abandoned revenue – that's almost 17.5% of the +7 SSS goal (\$24.6MM)

MATH

The average store did 54K tickets in 2019 (online + store)

The AOV was about \$22 in 2019 (online + store)

To increase SSS YoY by 7%, we'll need to drive 3,780 tickets/store @ \$22 AOV

There were about 285 Same Stores last year

We have 4.8MM records in our database, assume half are grossly unengaged
= 2.4MM engaged records across about 285 stores means about 8,420
contactable and engaged records per store

That means we need 44% of each store's records to buy *just one more time*.

TT1 [[@Lauren Frazell](#)]
Tony Toubia, 11/12/2020

But we do face difficult decisions

TECHNOLOGY

New marketing cloud instance with advanced capabilities proven to optimize campaign performance is within reach, but requires a foundational migration investment

ANALYTICS

Tracking and influencing same-store sales, new store growth and other detailed performance metrics at a user-level requires an identity strategy and a robust analytical tool-set

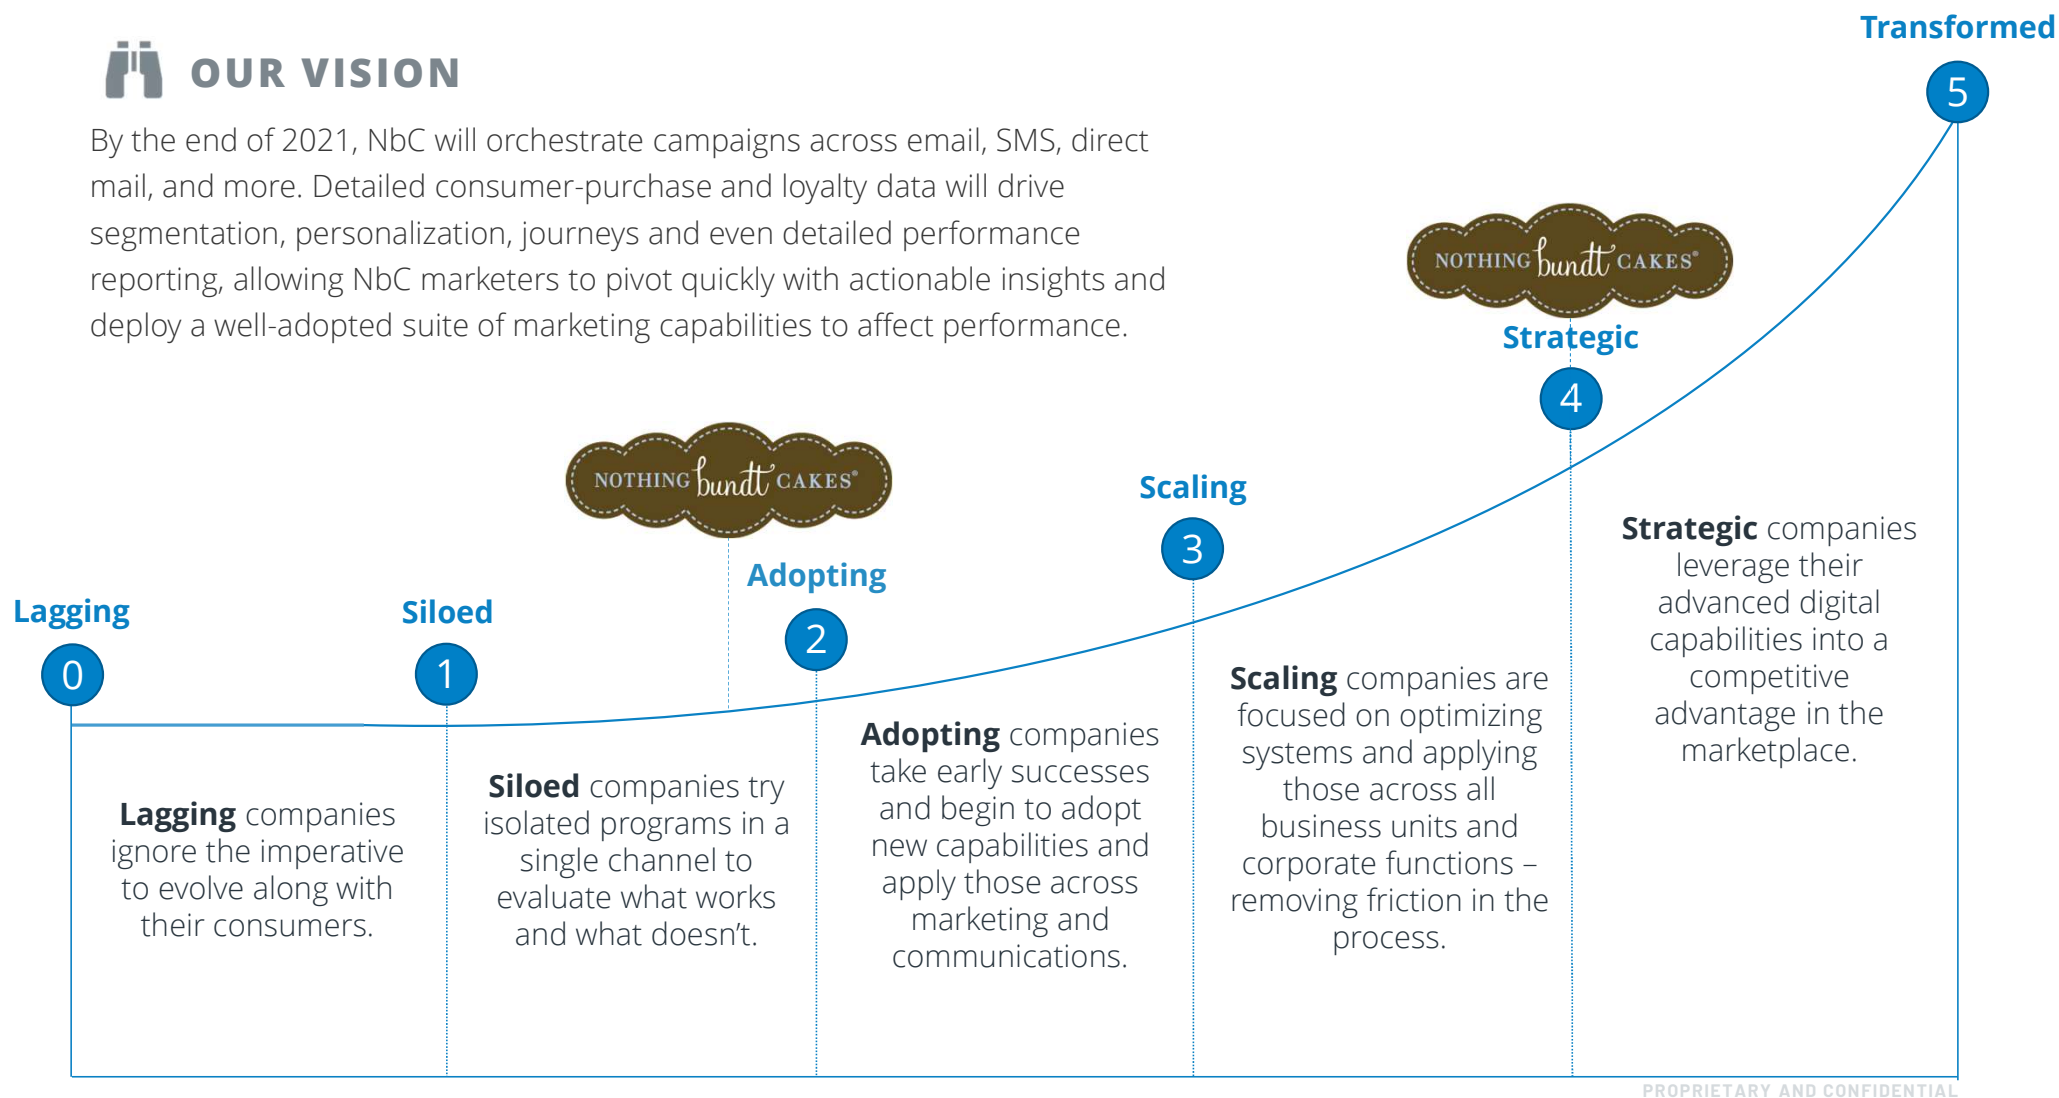

CAMPAIGN MANAGEMENT

Streamline process to drive efficiency and deploy CRM tactics quickly

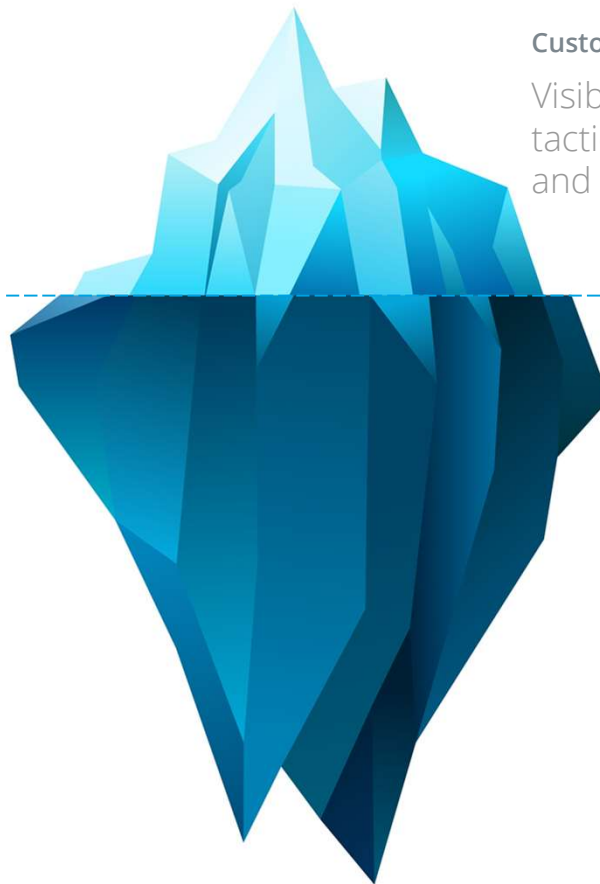

OUR VISION

By the end of 2021, NbC will orchestrate campaigns across email, SMS, direct mail, and more. Detailed consumer-purchase and loyalty data will drive segmentation, personalization, journeys and even detailed performance reporting, allowing NbC marketers to pivot quickly with actionable insights and deploy a well-adopted suite of marketing capabilities to affect performance.

OUR FOCUS

Help Nothing Bundt Cakes tackle the abundant **“Above the Line”** customer data activation opportunities *now* in order to quickly accelerate return on technology investments and lay a foundation for **“Below the Line”** customer data management opportunities *next*

Customer Data Activation

Visible **“Above the Line”** marketing tactics drive acquisition, retention and sustained customer engagement

Above the Line ↑
Below the Line ↓

Customer Data Management

Sophisticated **“Below the Line”** value creation in the form of deeper customer relationships using 1st, 2nd and 3rd party data enrichment for a deep customer understanding

UTILIZE

A focus on adoption and application of key licensed capabilities and features

OUR CHARTER

Leverage **SFMC and relevant mar-tech** investments to **build, nurture, and retain** commercially valuable, direct, **1:1 relationships** between Nothing Bundt Cake's brand, bakeries, and their customers.

PERSONALIZE

Lifecycle journeys and targeted push campaigns that meet consumers in their moment

ENGAGE

Beyond email – to SMS, social ads, direct mail and more

KNOW

A well-balanced and appropriately leveraged first-party data asset

PLAN IN A PAGE

UTILIZE: RETURN ON TECH INVESTMENT

A focus on adoption and application of key licensed capabilities and features

1. Migrate to SFMC 2.0 to Unlock: Einstein Scoring, Send-Time-Optimization, Content Selection, Einstein Recs, Ad Studio, SMS, Journey Builder
2. Extend Data integrations to Unlock: RFM Segmentation, Behavioral Triggers, Purchase Journeys, SSS Reporting & Insights

Engagement Scoring, Send-Time Preferences, Product and Content Affinities, Path Optimizer, RFM Segmentation

Einstein Content Selection & Dynamic Content, Behavioral Triggers, RFM Personalization, Journey Split Paths

Ad Studio, SMS, Direct Mail, Channel Prioritization, Message Saturation, Message Sequencing

KNOW: MANAGE CUSTOMERS AS AN ASSET

A well-balanced and appropriately leveraged first-party data asset

Key Activities:

1. Configure key purchaser segments
2. Configure key engagement segments
3. Test & learn via path optimizer in journey campaigns
4. Explore data and automate key performance reporting (SSS pacing)
5. Analyze Einstein Message, Copy, Content, Send-Time, Engagement, and Frequency Insights as appropriate
6. Enhance 1P data collection

PERSONALIZE: MOMENT ORIENTATION

Lifecycle journeys and targeted push campaigns that meet consumers in their moment

Key Activities:

1. Enhance planned campaigns by moving from “batch and blast” to journeys using Einstein Scoring, Send-Time Optimization and x-channel campaigning
2. Launch baseline subscriber journeys – from welcome and onboarding, to birthday and re-engagement
3. Scale dynamic content using Einstein Content Selection and affinity insights
4. Launch customer lifecycle journeys – using purchase-level data for post-purchase, loyalty, purchase anniversary, and win-back journeys
5. Development of advanced insight-driven experiences to intervene at key moments, from churn risk to purchase propensity

ENGAGE: 1-1 EVERYWHERE

Beyond email – to SMS, addressable media, push, direct mail and more

Key Activities:

1. Activate cross-channel journey features including SMS, Ad Studio retargeting, and small batch direct mail
2. Configure coordinated suppression, message sequencing, and retargeting

PLAN IN A PAGE

UTILIZE: RETURN ON TECH INVESTMENT

A focus on adoption and application of key licensed capabilities and features

PROPRIETARY AND CONFIDENTIAL

Path to Value Timeline

PROPRIETARY AND CONFIDENTIAL

Key Decisions & Implications

What investments and decisions need to be made and how will those decisions impact our plan?

PHASE 1

PHASE 3

What investments or decisions does this plan hinge upon?

- An investment in SFMC 2.0 migration and partner (Onosys & Proteus) subscriber re-integration
- The decision or ability to make purchase data available for integration (Toast/Onosys) and investment in the data integration
- An investment in time and creative to support new subscriber journeys
- An operational investment in adopting new dynamic creative production approach
- An investment in services to configure journeys using new data integrations
- An investment in time and creative to support new customer journeys

What investments or decisions will alter this plan?

- Which assets and data needs to be migrated?
- Which subscriber journeys do we want to build?
- Which channels and mediums do we want to integrate?
- Any necessary investment for integrating Attentive Journey Builder activity
- What budget do we want to put behind incremental cost activations (ads in journeys)?
- Which bakeries do we want to pilot purchase/loyalty data integration with?
- What is our pilot definition of success?
- How will we measure same-store-sales at a person level?
- Are single-use coupon codes required for effective offer strategy?
- What is our post-pilot roll-out pace?
- Which customer journeys do we want to build?
- What technology will you use or license to visualize performance and pacing reports?

Standard Subscriber & Customer Lifecycle Journeys

Common touchpoints across marketing and commerce that hold engagement and influence loyalty

AWARENESS	CONSIDERATION	PURCHASE	POST-PURCHASE	RETENTION	LOYALTY
Welcome/Onboarding	Cart Abandon	Purchase Confirmation	Post-Purchase Review	Purchase Win-Back	Birthday
New Arrivals	Browse Abandon	Curbside Pickup	Shipment Tracking	Re-Engagement	Purchase Anniversary
Best Sellers	Category Abandon		Business/Corp Gift Track		Celebration/Event Tracker
	Search Abandon				
	Affinity				
	Low Inventory

Accelerating the ROI of your Mar-Tech Investments

PATH TO VALUE MAP

Build Baseline Subscriber Journeys

From welcome, and onboarding to unengaged, automate the cross-channel journey triggers that any QSR and retailer must anticipate

Build Customer Lifecycle Journeys

With online and offline integrated consumer-level purchase/loyalty data – build abandoned cart, order-confirmation, post-purchase, win-back and more purchaser lifecycle journeys

Insight Driven Experiences

Move beyond the obvious subscriber and customer lifecycle journeys to unlock custom, x-channel, brand-unique experiences orchestrated across *any* addressable channel or medium

Migrate to “SFMC 2.0”

Avoid incurring further technical debt: migrate just the necessary assets and data, providing partners with new API endpoints and creating a scalable data foundation

Extend Data Integrations

Integrate user-level online and offline purchase + loyalty data to power key segmentation, dynamic content, detailed reporting automations, and journeys

Data Exploration

Gain an understanding of data available by inspection or query, or integrate data with visualization tools such as Tableau or internal system

Enhance Planned Campaigns

Move from a batch campaign-led approach to multi-touch, cross-channel journeys with out-of-the-box capabilities and a scalable campaign planning framework

Scale Dynamic Content

Activate dynamic content planning framework and Einstein Content Selection + scripting capabilities in SFMC to scale dynamic experiences and track content-level analytics

Identity Resolution & Consent

Resolve identity and reconcile data into a unified profile across sales, service, marketing, and commerce to create a golden record and manage consent

Phase 1: Unlock New Capabilities

PATH TO VALUE MAP

Build Baseline Subscriber Journeys

From welcome, and onboarding to unengaged, automate the cross-channel journey triggers that any QSR and retailer must anticipate

Build Customer Lifecycle Journeys

With online and offline integrated consumer-level purchase/loyalty data – build abandoned cart, order-confirmation, post-purchase, win-back and more purchaser lifecycle journeys

Insight Driven Experiences

Move beyond the obvious subscriber and customer lifecycle journeys to unlock custom, x-channel, brand-unique experiences orchestrated across *any* addressable channel or medium

Migrate to “SFMC 2.0”

Avoid incurring further technical debt: migrate just the necessary assets and data, providing partners with new API endpoints and creating a scalable data foundation

Extend Data Integrations

Integrate user-level online and offline purchase + loyalty data to power key segmentation, dynamic content, detailed reporting automations, and journeys

Data Exploration

Gain an understanding of data available by inspection or query, or integrate data with visualization tools such as Tableau or internal system

Activate dynamic content planning framework and Einstein Content Selection + scripting capabilities in SFMC to scale dynamic experiences and track content-level analytics

Identity Resolution & Consent

Resolve identity and reconcile data into a unified profile across sales, service, marketing, and commerce to create a golden record and manage consent

Migrate to SFMC 2.0

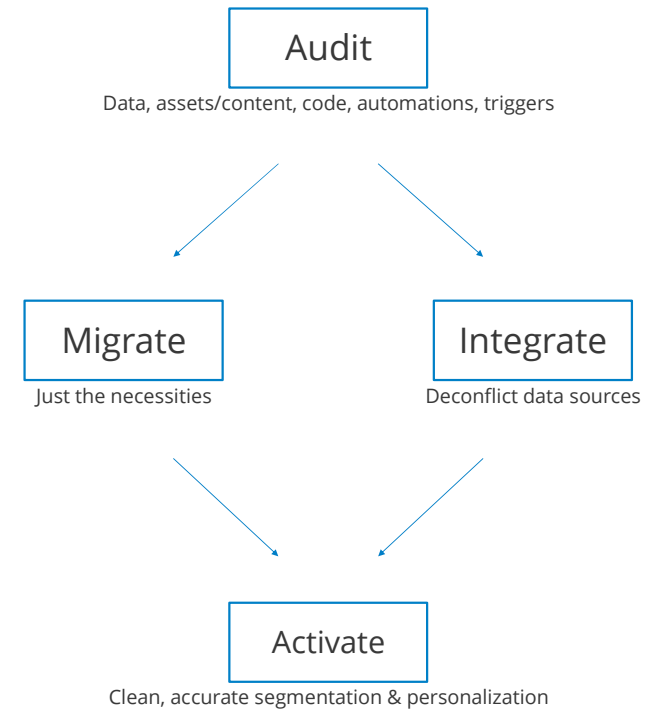

PHASE 1: UNLOCK NEW CAPABILITIES

Strategic Rationale

New and extensive capabilities are well within reach thanks to Nothing Bundt Cakes SFMC 2.0 instance, ready to be activated. This new instance includes critical strategic capabilities like journey building, advertising studio, Einstein machine learning, and more.

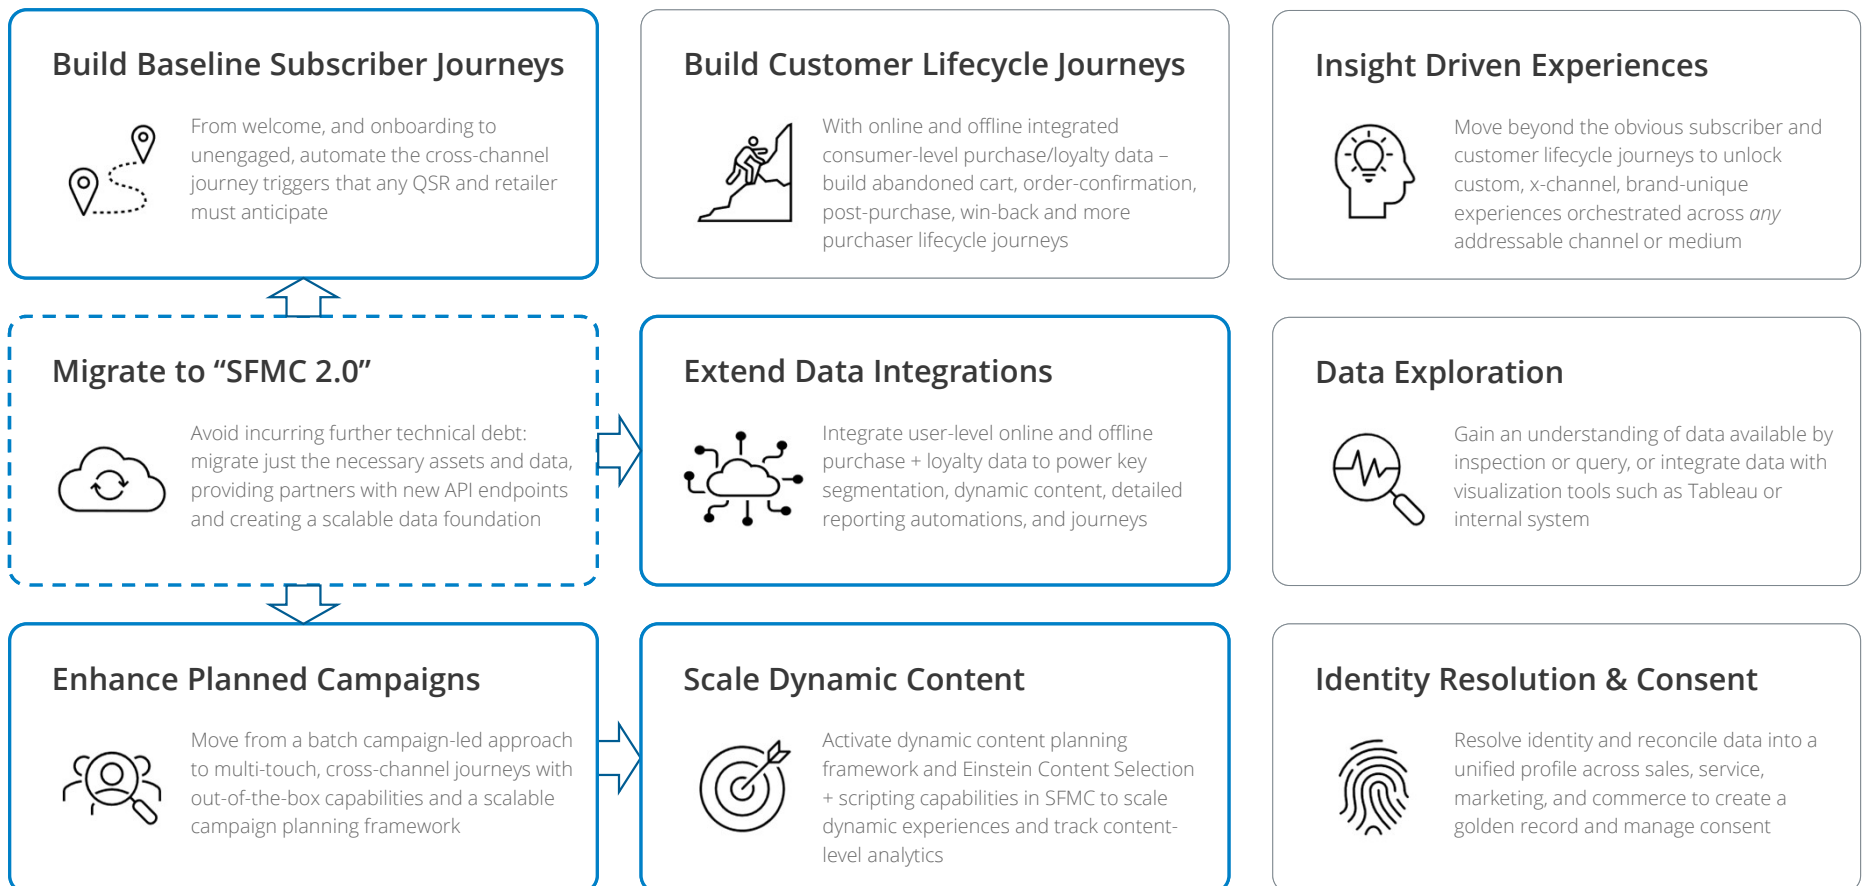

Why Now?

In addition to unlocking new capabilities faster, migrating instances now will be far more cost effective than later as there will be fewer migration tasks to complete. Furthermore, key current partner data integrations need to be reconfigured to protect against record collision and conflict.

Phase 2: Activate New Capabilities

PATH TO VALUE MAP

Enhance Planned Campaigns

PHASE 2: ACTIVATE NEW CAPABILITIES

Strategic Rationale

Consumers want to be engaged on their terms. Batch and blast campaigns continue to underperform multi-touch, x-channel journeys. The most effective campaigns nurture consumers' recall across email, SMS, ads, and a host of other addressable channels.

Why Now?

New SFMC capabilities unlocked by migrating to 2.0 will make x-channel, multi-touch journey building a scalable reality. Activating out-of-the-box Salesforce Einstein capabilities will help NbC standout in an increasingly competitive inbox (and social feed) with dynamic decisioning and content.

EINSTEIN ENGAGEMENT SCORING FOR JOURNEYS

Use Case Description:

Leverage split activities in journeys that divide customers based on likelihood to open, click, unsubscribe, or convert, or based on their engagement persona.

Use Case Objective:

Optimize journey paths and marketing mix to maximize engagement and conversion at the individual level.

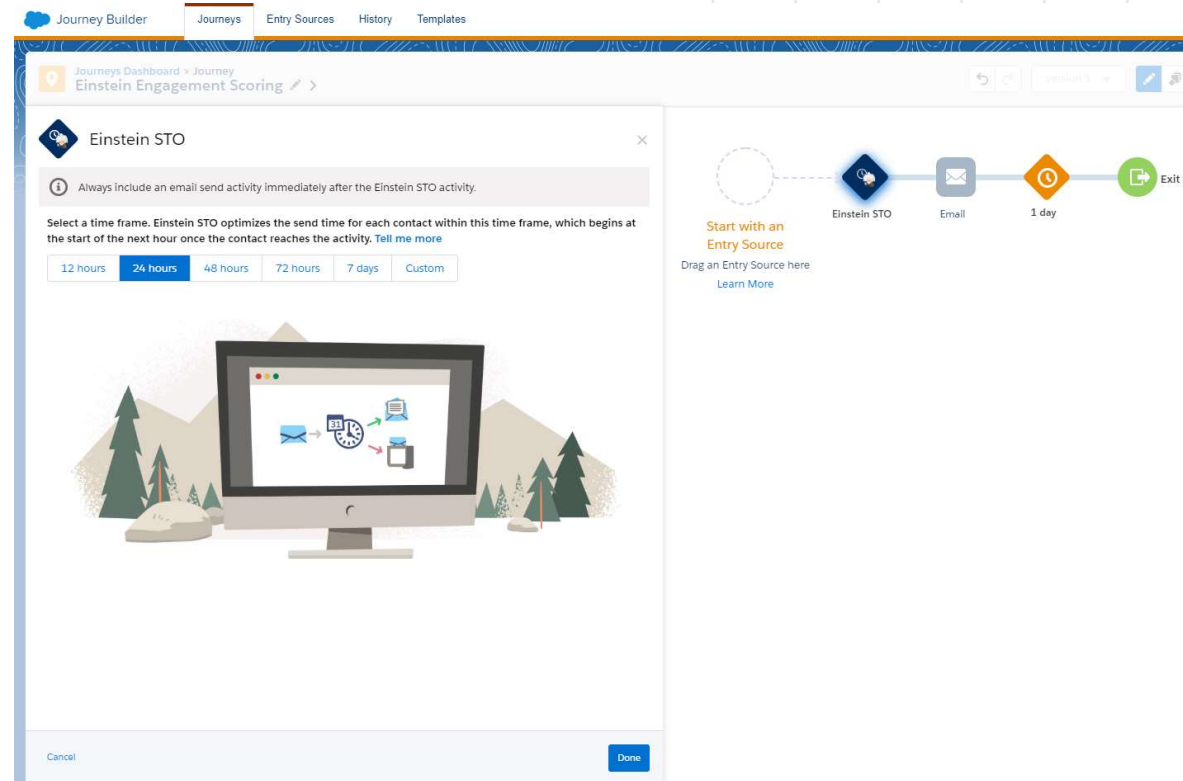

EINSTEIN SEND TIME OPTIMIZATION FOR JOURNEYS

Use Case Description:

Add the Einstein Send Time Optimization (STO) activity before appropriate email activities in a journey. STO assigns the best hour to send based on individualized analysis.

Use Case Objective:

Increase overall engagement for a journey – each message is sent to each contact in the journey at the hour within the next 24 hours that the contact is most likely to open it.

DEFINING THE ROLE OF SFMC CROSS-CHANNEL CAPABILITIES

Channel	JB Enabled	Use When...	Examples
SMS/MMS	Yes	Message visibility is key "Open" is more important than click Timely service notifications (curb-side) Acquisition is important	Service case notification Sneak peak sales In-store signage
Ad Studio	Yes	Message reach is key In support of alt channel message recall The consumer is (predicted) high value The subscriber is email under-engaged Lookalike acquisition is important	Cross/up-sell journeys High propensity to purchase audience Re-engagement/retention journeys
Mobile Push	Yes	The customer is a user of an NbC app As an SMS alt for non-opted-in app users FUTURE	Sneak peak sales Product notifications
Small Batch Direct Mail	Yes - AppExchange	The consumer is especially high value The sale is especially high ROI The physical copy of key info is important	Predicted high value customer/journey Focused on new product/service New store opening or event in area

Extend Data Integrations

PHASE 2: ACTIVATE NEW CAPABILITIES

Strategic Rationale

Integrate user-level online and offline purchase + loyalty data to power key segmentation, dynamic content, detailed reporting automations, and journeys.

Why Now?

Integrating consumer-level purchase data is arguably the most important strategic imperative for scaling a meaningful CRM program long-term.

PACING

Build Baseline Subscriber Journeys

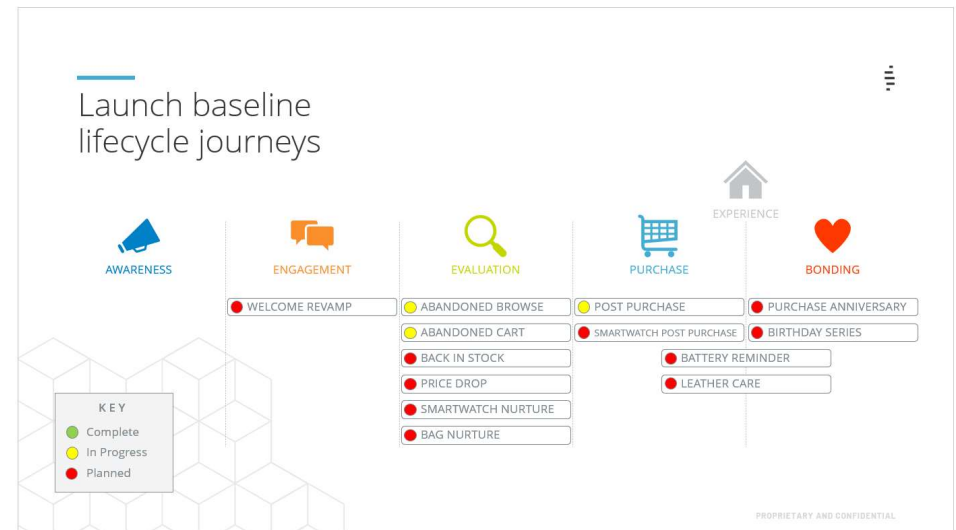

PHASE 2: ACTIVATE NEW CAPABILITIES

Strategic Rationale

Without purchase data, there are still many moments in which Nothing Bundt Cakes can intervene to delight prospects and customers alike, from welcome, to birthday, to re-engagement, and more.

Why Now?

Before we unlock the power of integrated purchase data, let's get the basics right and build brand-love. Lifecycle journeys are less of a delight than a consumer expectation in today's connected landscape.

EXAMPLE

PROPRIETARY AND CONFIDENTIAL

Scale Dynamic Content

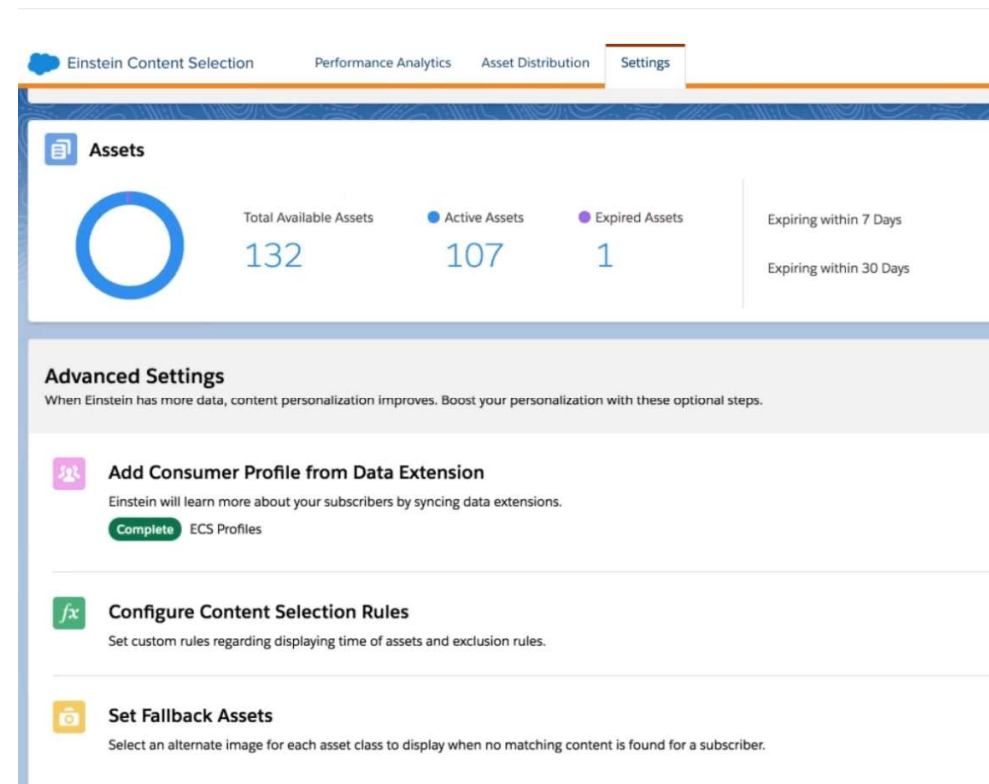

PHASE 2: ACTIVATE NEW CAPABILITIES

Strategic Rationale

Deliver content that is personalized for each customer when they open your messages, driving up engagement rates and automating content delivery and optimization.

Why Now?

Einstein Content Selection and Dynamic Content will bring new content-level analytics to your briefing, making the tools work harder and enabling your creative teams and partners to work smarter.

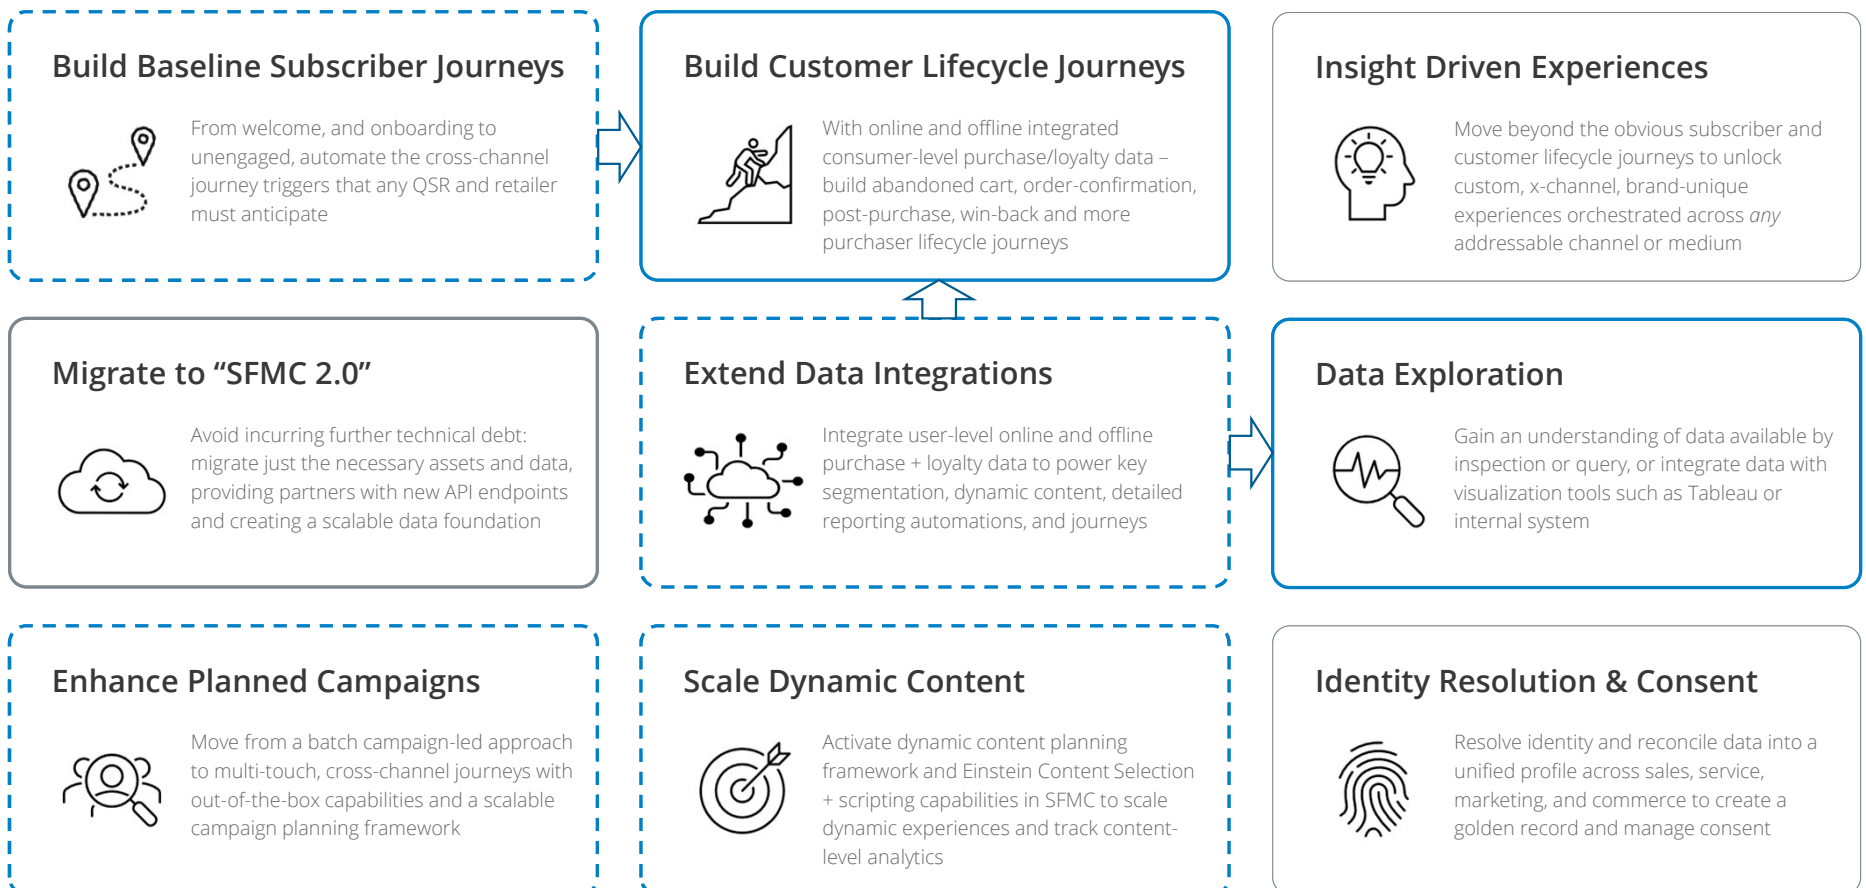

Note: Einstein Content Selection utilizes "super messages", consult your SFMC contract

CONFIDENTIAL

Phase 3: Meeting Today's Consumer Expectations

PATH TO VALUE MAP

Analytics: Three Areas of Focus

NOTHING BUNDT CAKES

MEASUREMENT

- Reporting
- KPI development
- Dashboard creation
- Insight development

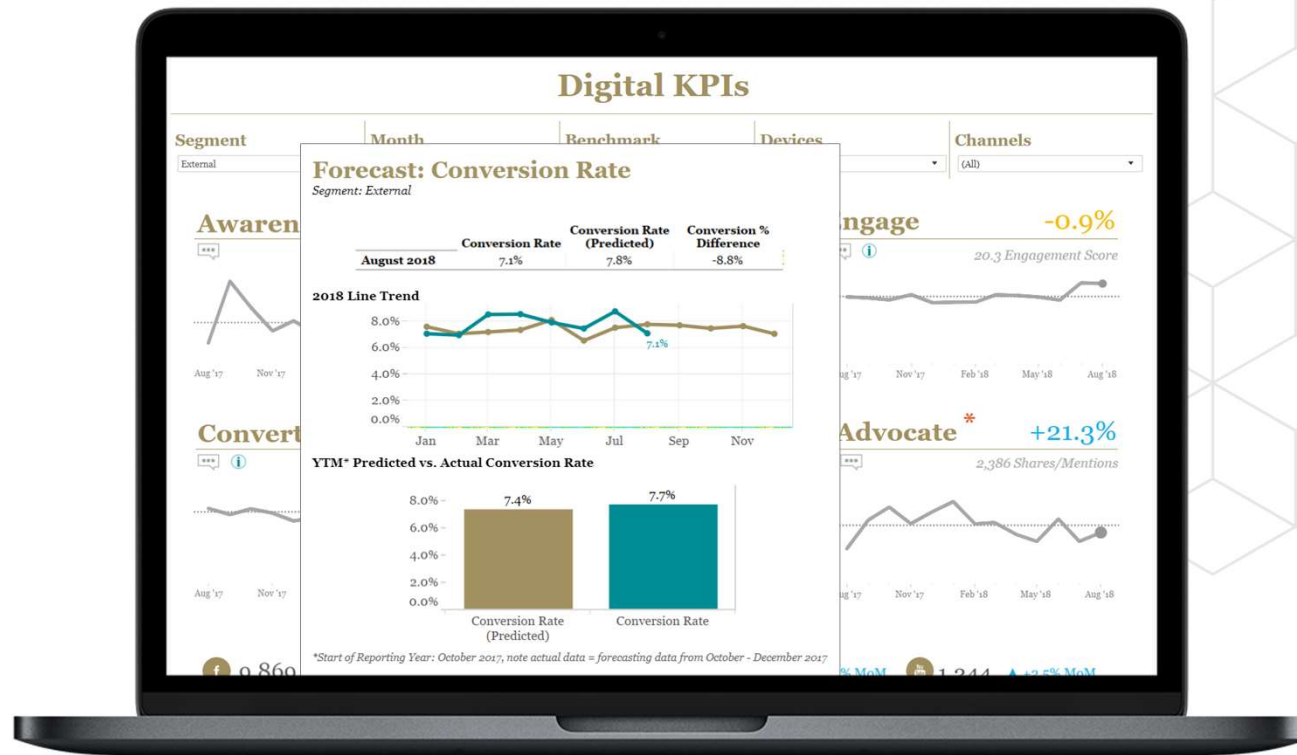

OPTIMIZATION

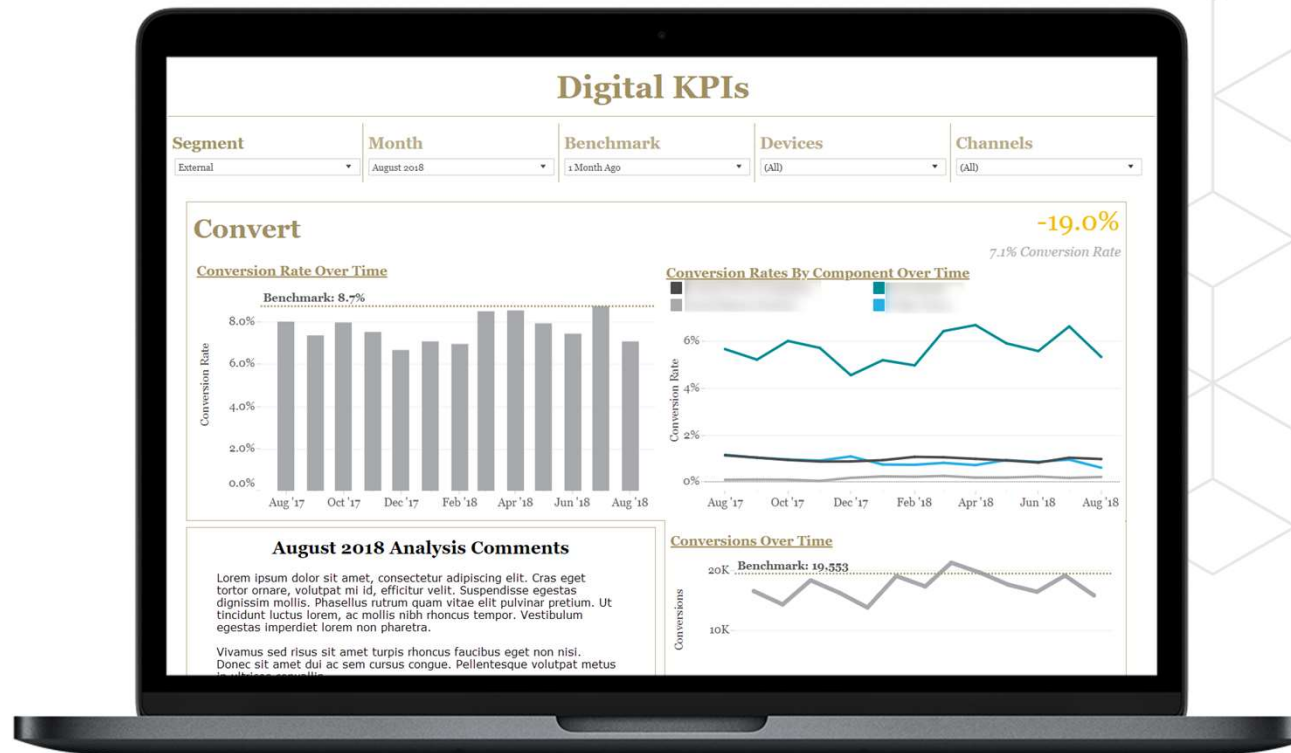

- Testing plan
- Iterative optimization

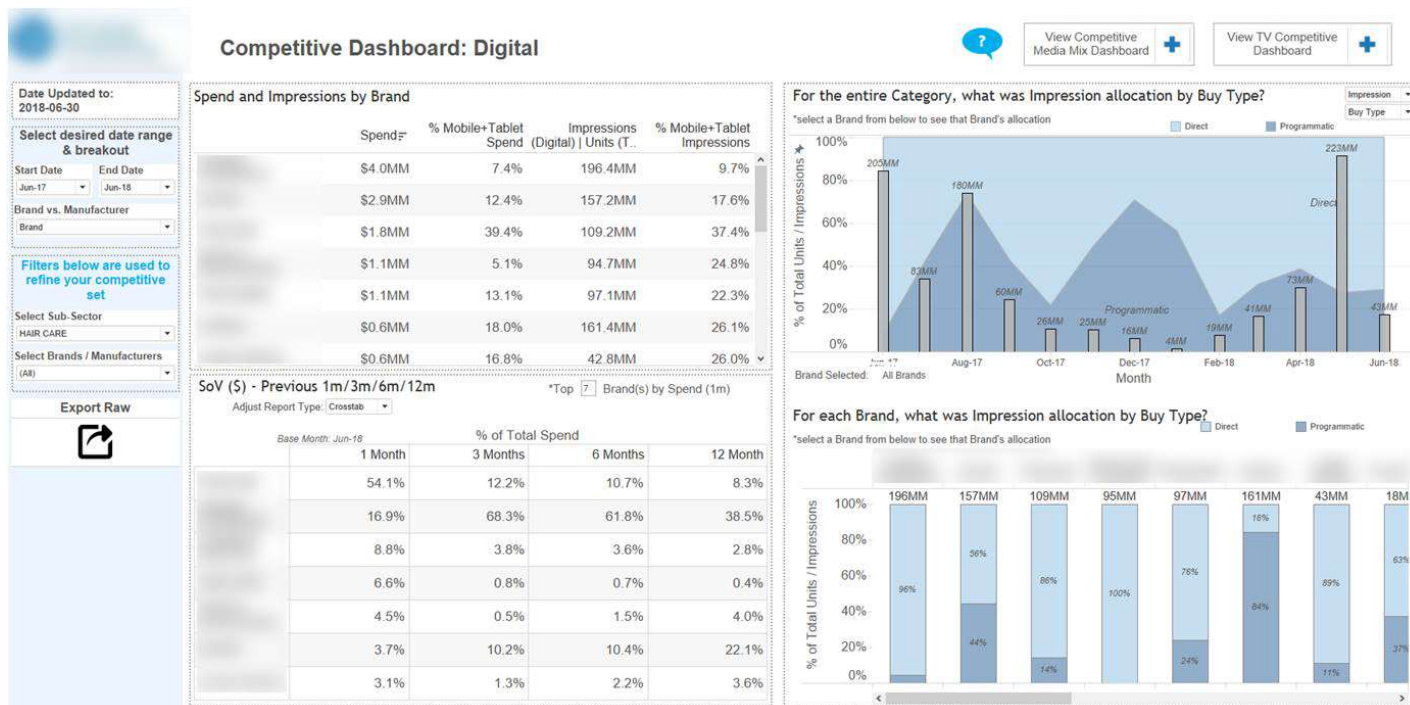

PREDICTIVE MODELING

- + Customer Lifetime Value
- + AI-enabled campaigns
- + Predictive customer interactions

Dashboards...are not analysis

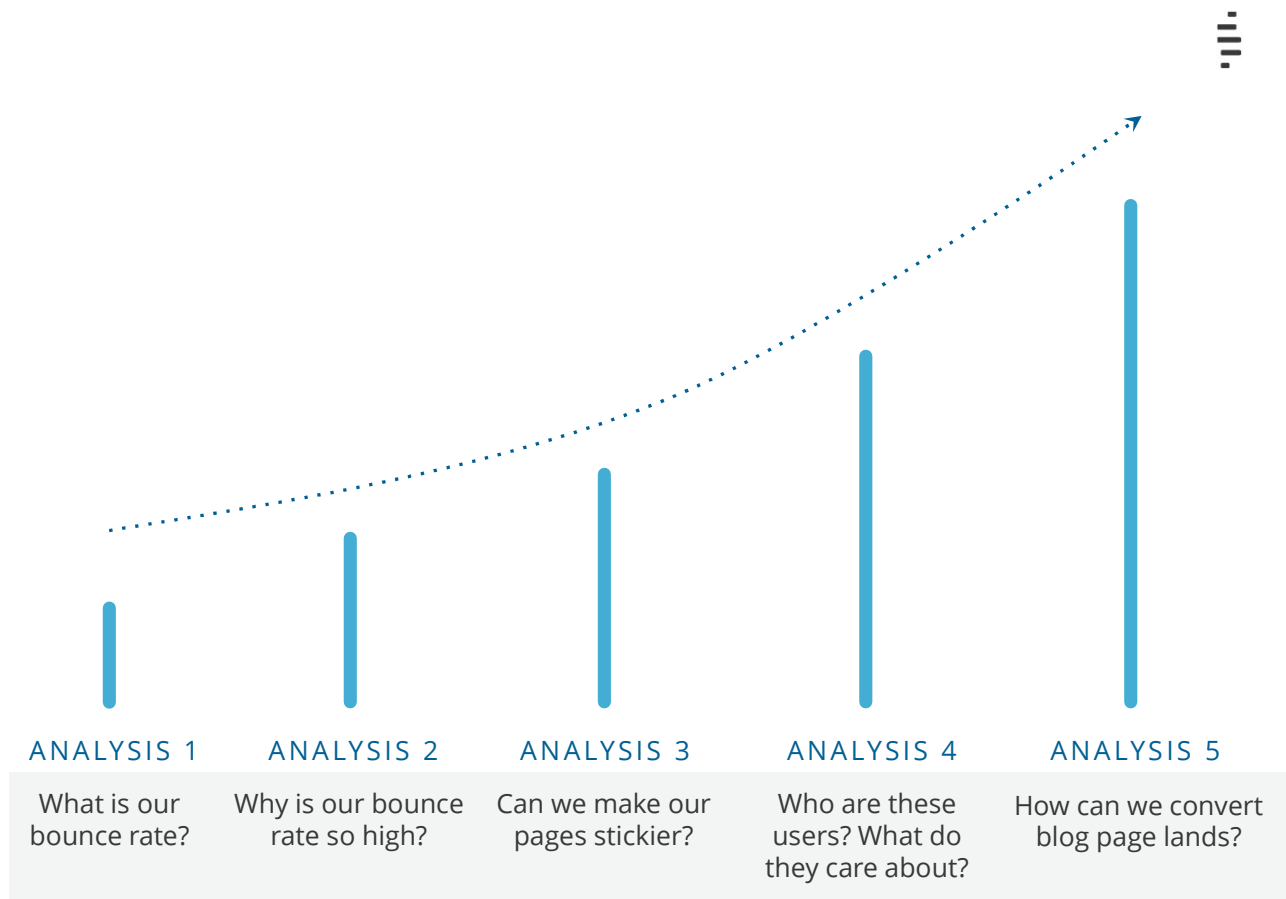

Analysis transforms raw data into **actionable insights** and business **recommendations** that have a demonstrable, tangible impact on our client's **bottom line**.

Analysis starts with a question.

The result:
continual growth

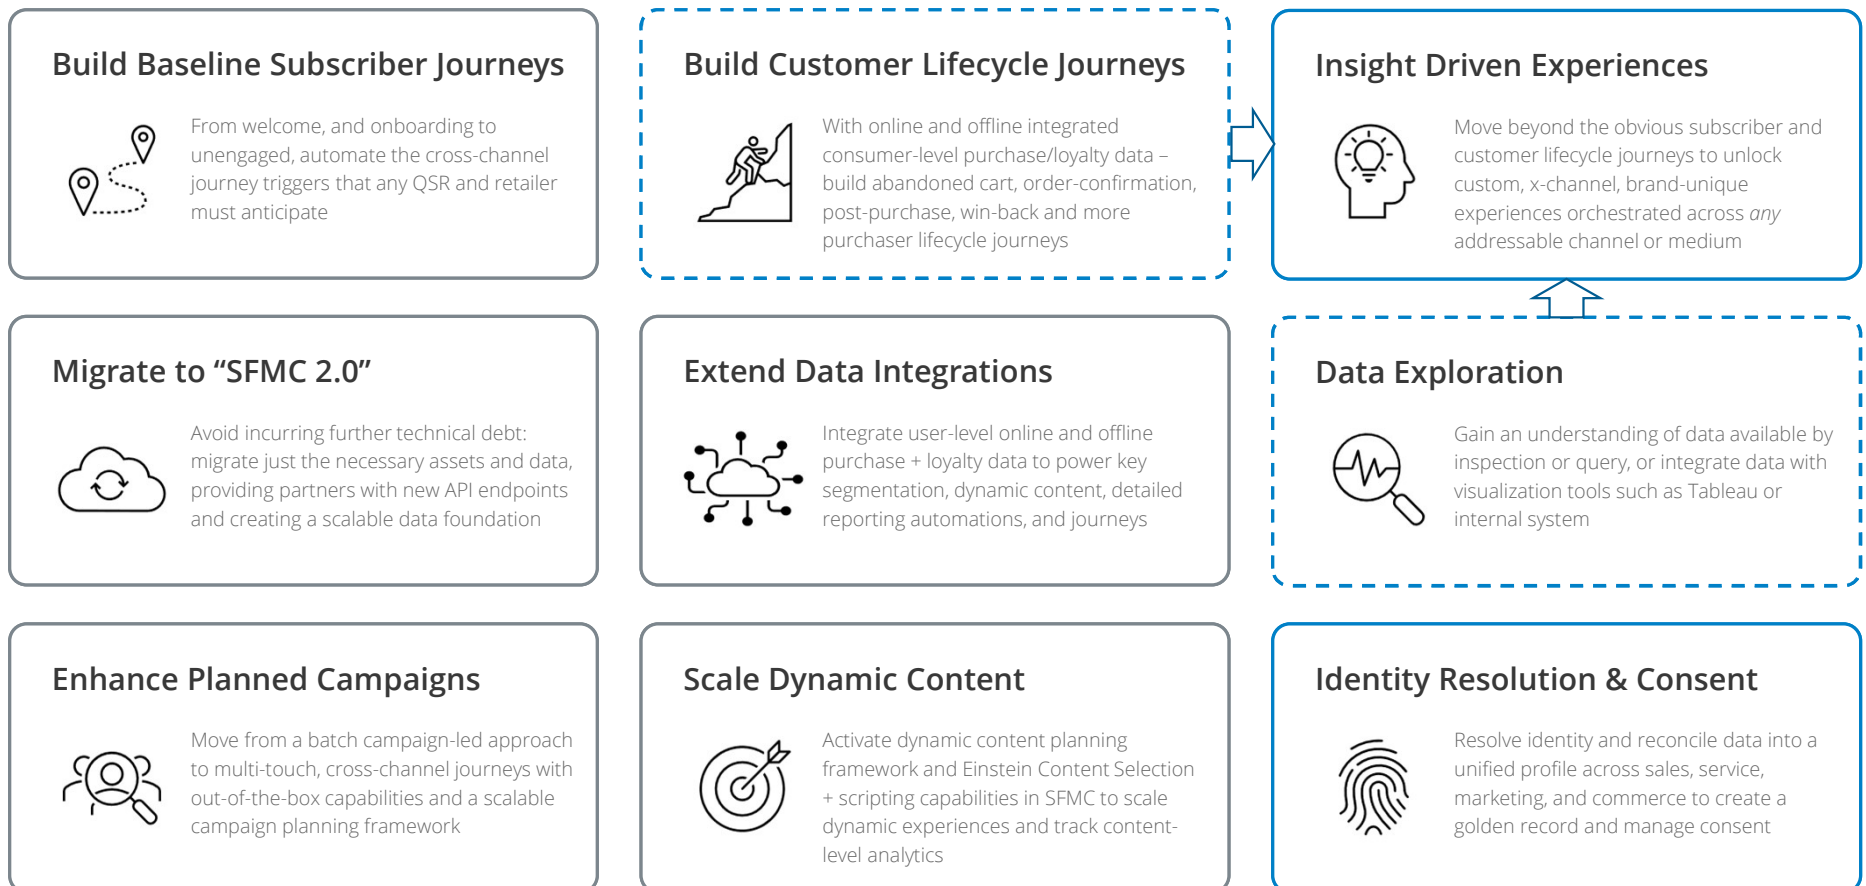

One question leading to the next...

PROPRIETARY AND CONFIDENTIAL

(2022) Phase 4: Future Proofing

PATH TO VALUE MAP

Customer lifetime value is the leading customer- centric metric

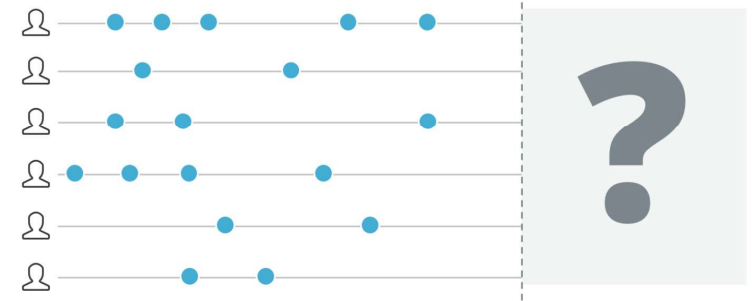

Successful brands are moving away from outdated, demographic-based segmentation and toward more individualized predictions of customer value derived from historical purchase data.

CLV models alone only get you so far

CLV has evolved from being hard to calculate to driving individual scores that influence personalized messages. We understand purchase behavior at a singular level and use that insight to activate moments across the customer journey.

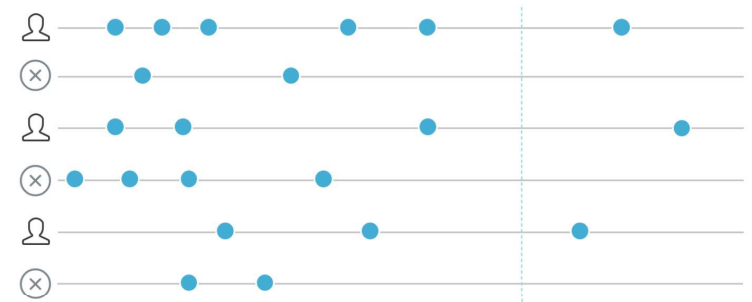

Purchase prediction

When is the next purchase expected?

Lifetime

When is the next purchase expected?

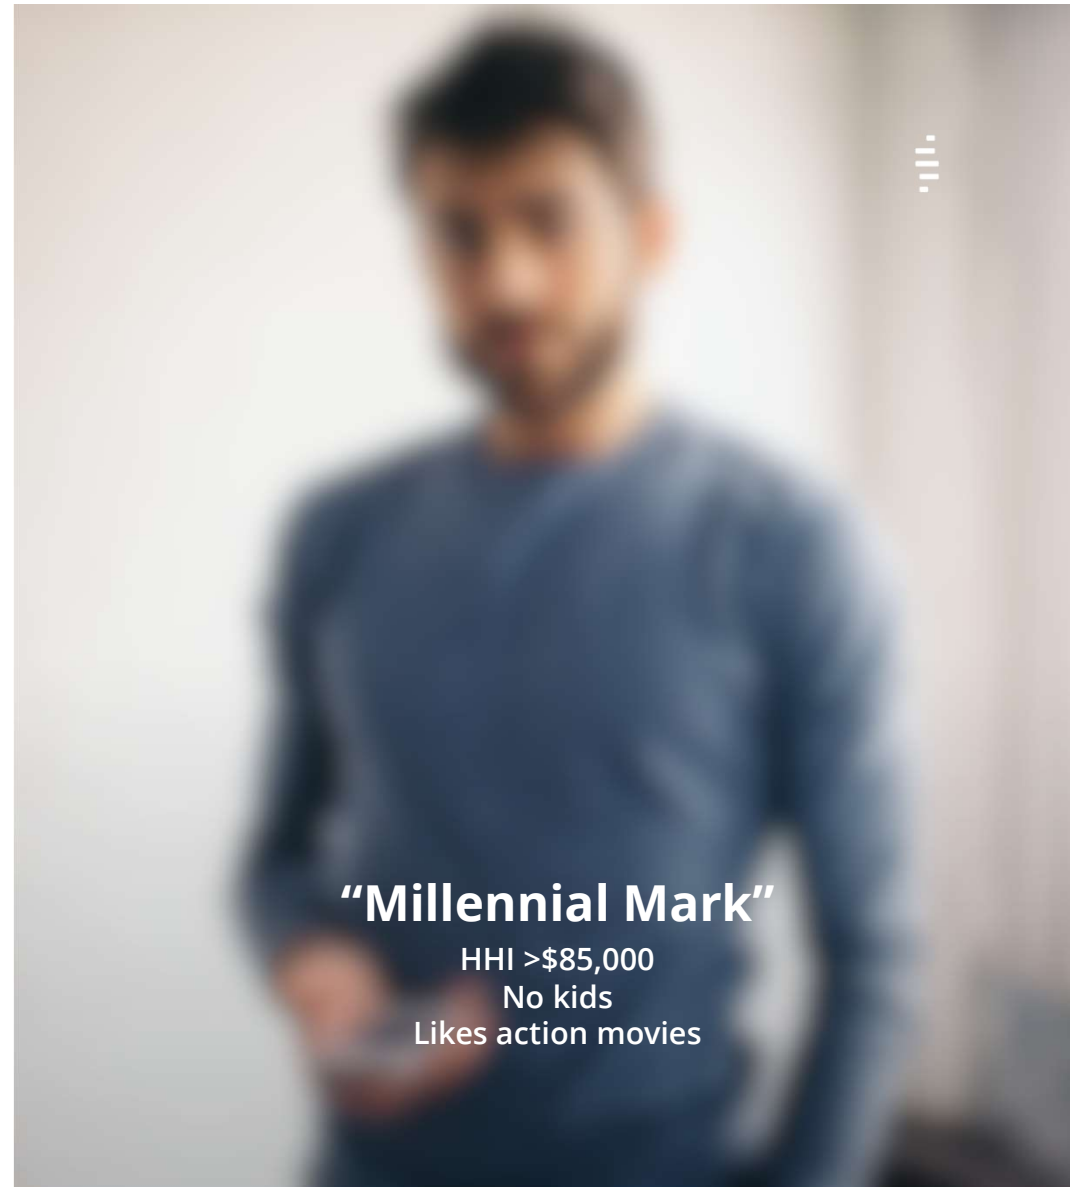

MYTH #1

Demographic-based cohorts

- + A heuristic summary derived from thousands or millions of people
- + Segment limited by observable demographic attributes: “busy moms,” “men ages 24-35”

PROPRIETARY AND CONFIDENTIAL

“Millennial Mark”

HHI >\$85,000

No kids

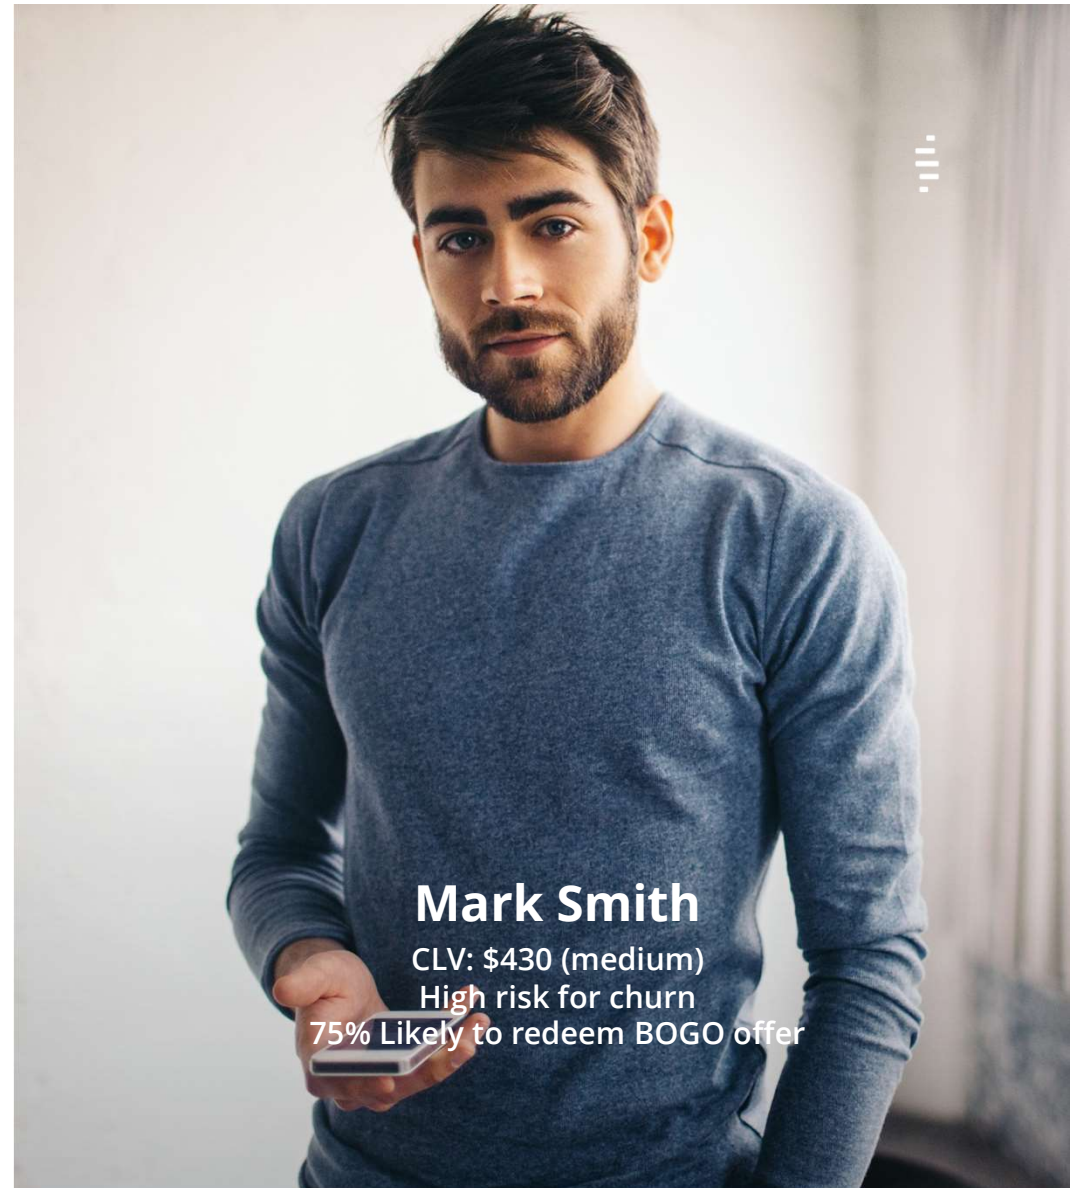

Likes action movies

MYTH #1

CLV-driven cohorts

- + Derived from historical purchase data and applied to individual-level predictions
- + Segmented by forecast value to the business: high, medium, low CLVs

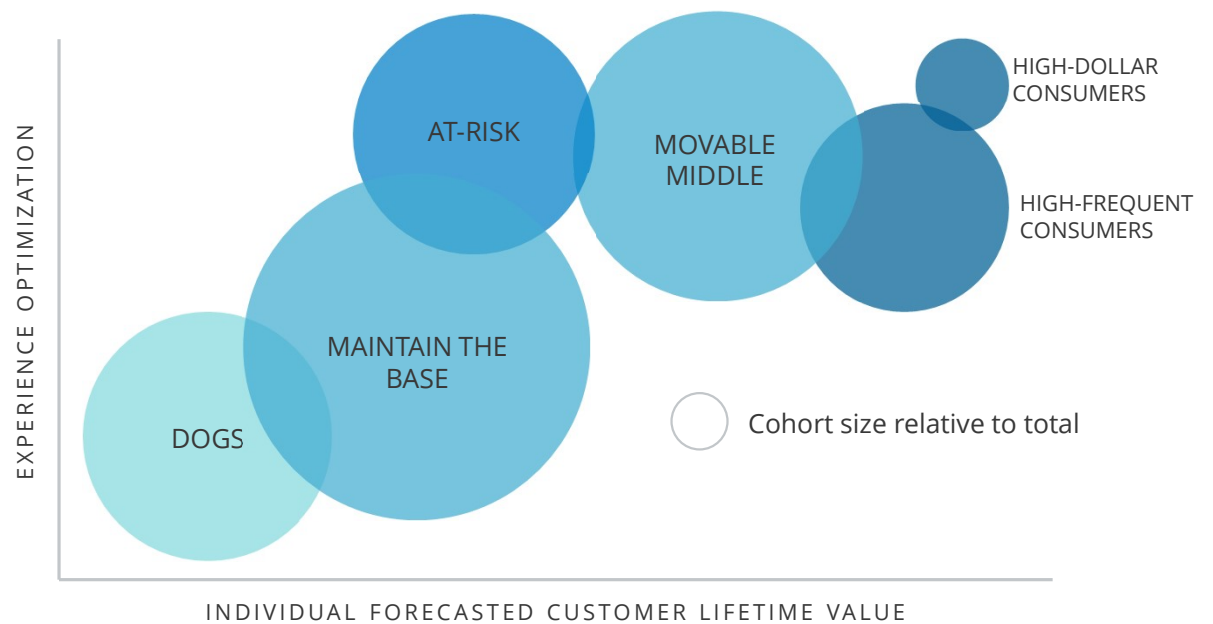

PROPRIETARY AND CONFIDENTIAL

CLV allows marketers to manage customers as an asset

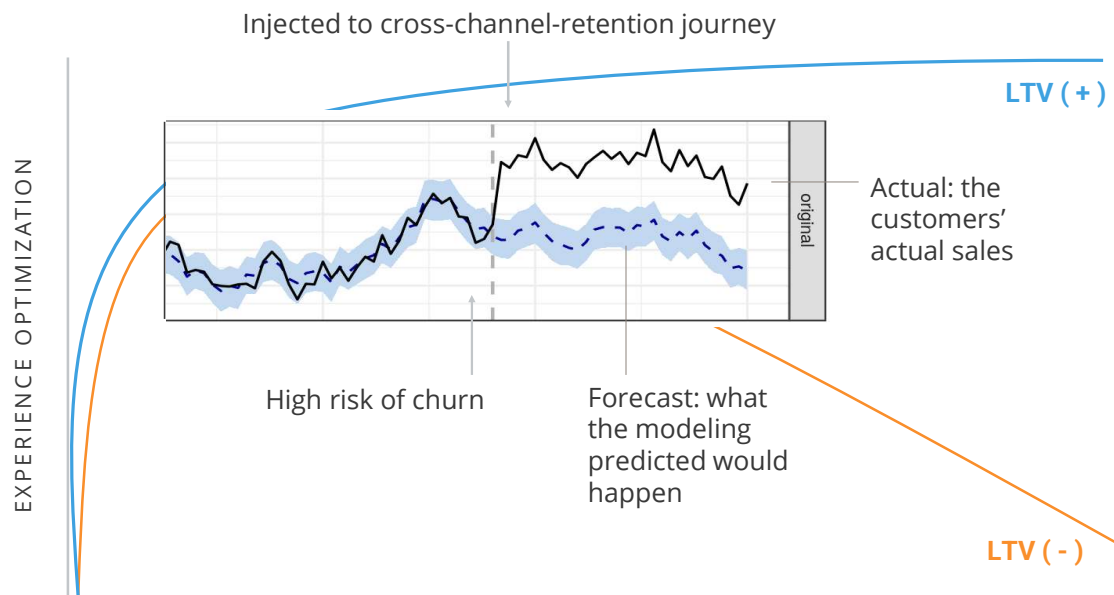

Balancing the Allocation of CLV Cohorts

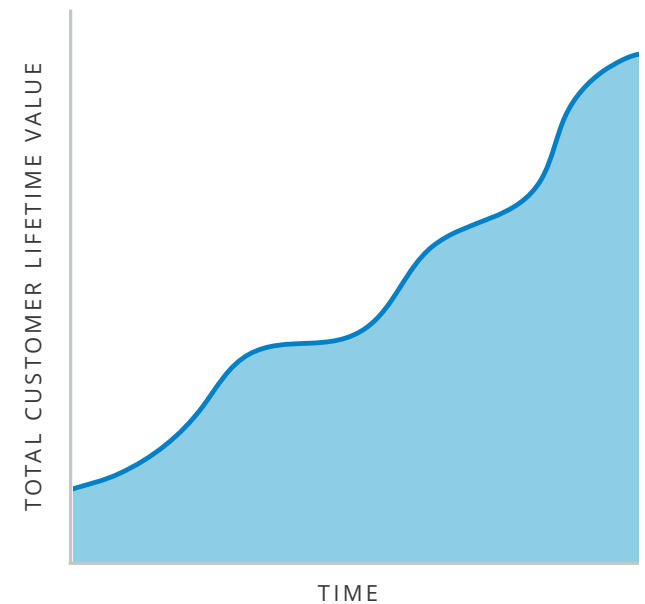

CLV in action

Our models allow us to proactively engage on a 1:1 level at critical moments—limiting churn and yielding massive growth in customer-asset value.

Individual Interventions lead to...

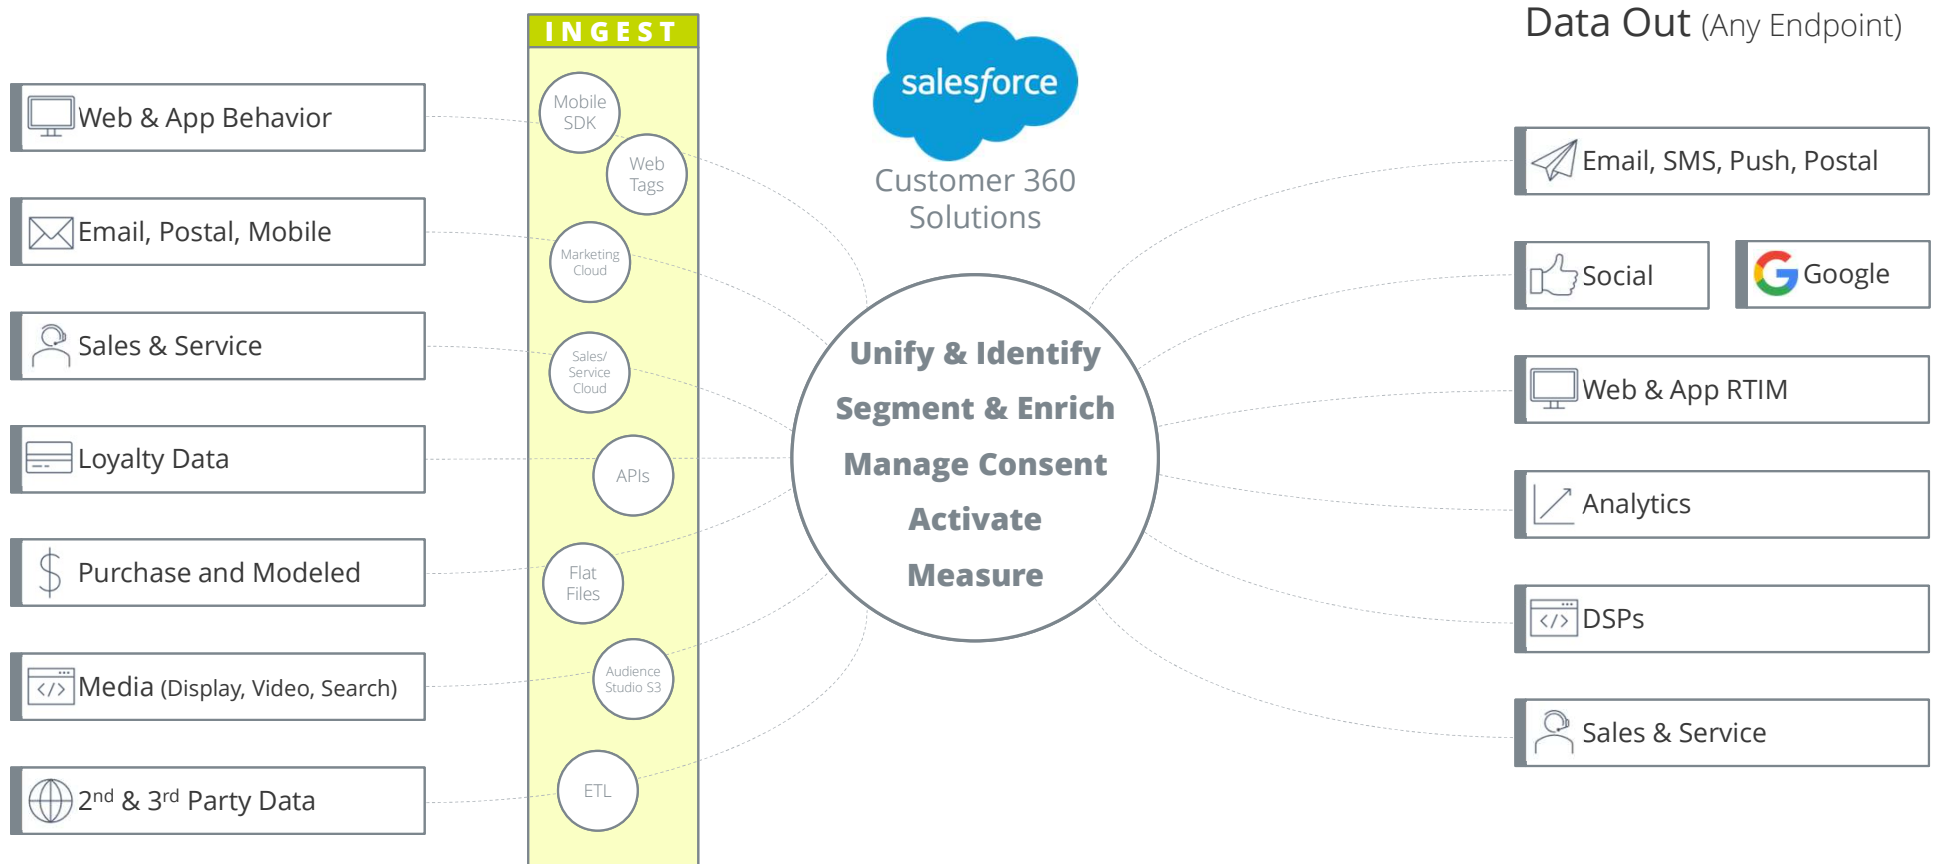

...Cumulative Customer "Asset" Growth

PROPRIETARY AND CONFIDENTIAL

Capture, Unify, Segment & Activate All of Your Customer Data

POWERFUL IDENTITY RESOLUTION

Bridge known and unknown profiles, when consented, for a 360 view

+ SUCCESS STORY

+ AMC Theatres Rewrites the Script with Revamped Email Program

PROPRIETARY AND CONFIDENTIAL

THE CHALLENGE

DEG and AMC Theatres collaborated to evaluate the customer experience in order to identify and roadmap opportunities for improved engagement and conversion.

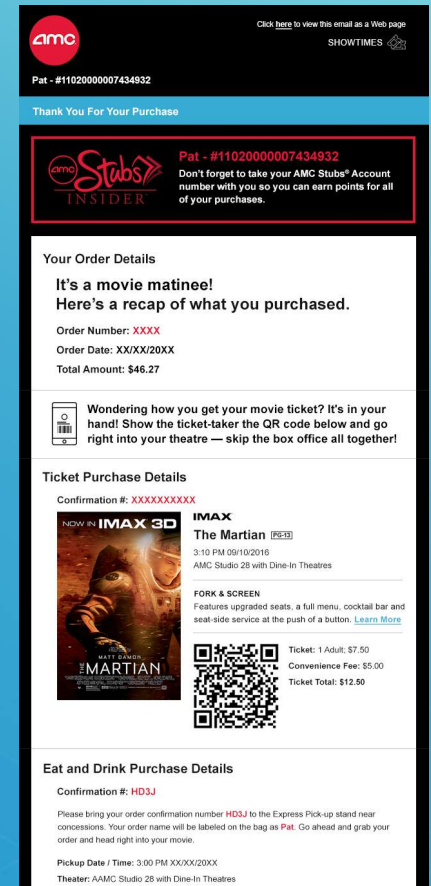

THE STRATEGY

- + DEG conducted focus groups to “walk the walk” and learn how AMC Theatres guests coordinate and execute their plans.
- + Using the research, DEG created a map of different moments a customer may experience, and as a result, among other outputs:
 - Revamped a personalized email receipt
 - Defined pre-show trigger points in the customer journey
 - Helped AMC implement a training program for its employees

Orchestrating Care

The American Red Cross partnered with DEG to develop a solution for its Preparedness, Health, & Safety Services program to better engage with donors and volunteers through social media.

KEY HIGHLIGHTS

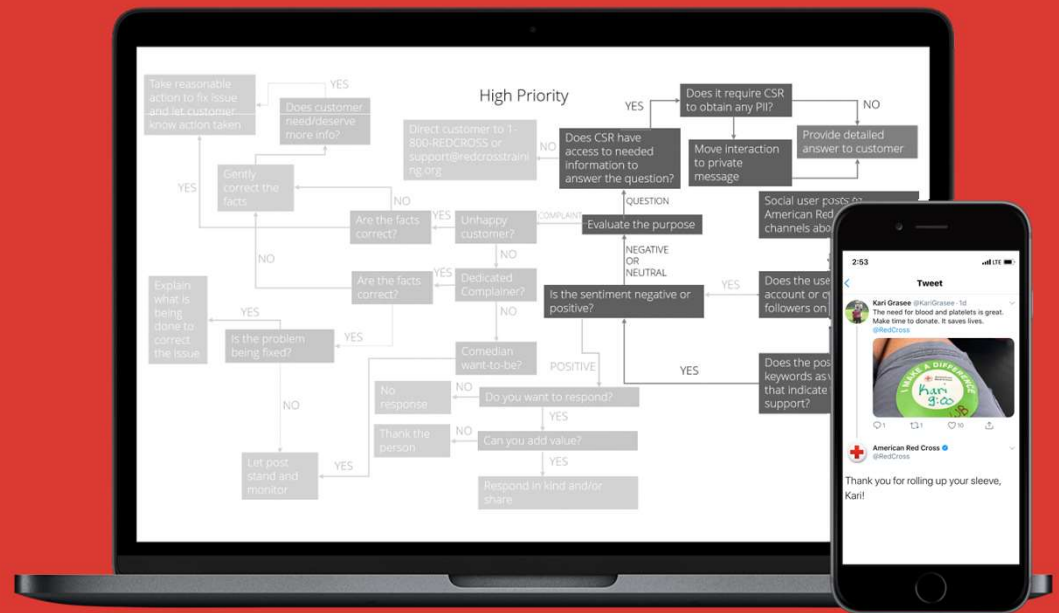

- + DEG implemented its Social Customer Care solution, leveraging Salesforce Service Cloud and Social Studio, and crafted a customer journey to remove friction and automate prioritization

THE RESULTS

- + The American Red Cross and DEG launched the social customer service solution as the division's first dedicated support channel, along with social media content and messaging enhancements
- + With continued optimization, the American Red Cross can now provide ongoing social media support that evolves to meet its audience's needs

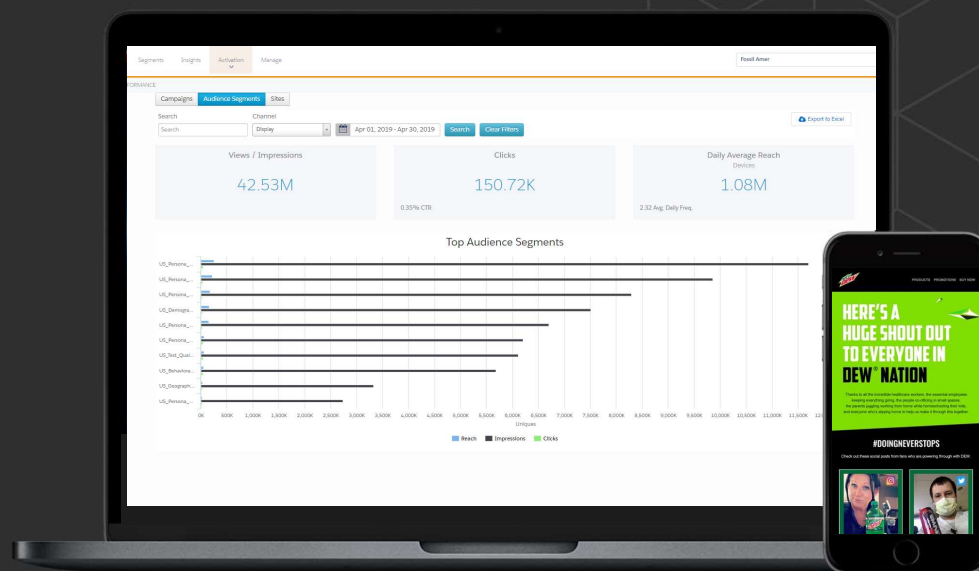

Refreshing Consumer Data

PepsiCo partnered with DEG, an Isobar Company to implement Salesforce Marketing Cloud and Audience Studio, migrating data from Adobe and Epsilon for improved data-driven marketing.

KEY HIGHLIGHTS

- + DEG implemented Salesforce Marketing Cloud and Audience Studio, while standardizing tagging within Audience Studio across all PepsiCo brands

CLIENTS USING SF

Salesforce and Partner Platforms

Savor the Good Life

To avoid any channel conflict, Cuisinart Canada partnered with DEG, an Isobar Company to build its first ecommerce site intended to sell only refurbished products and parts to expand its market.

KEY HIGHLIGHTS

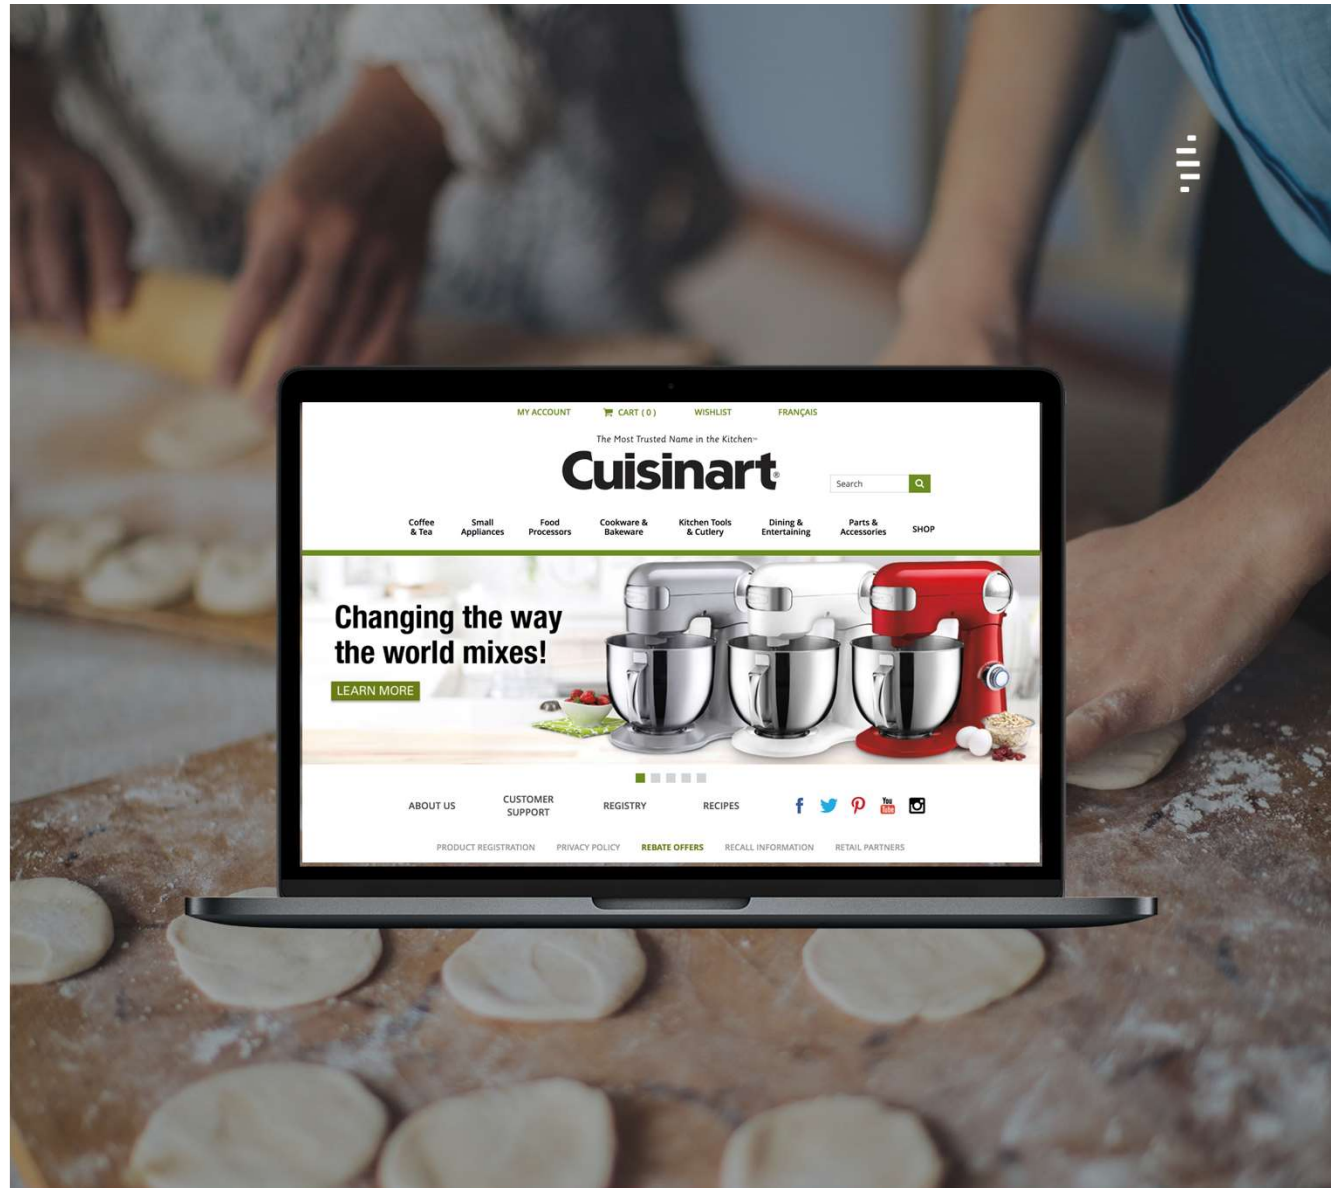

- + DEG built a UX-driven responsive website on Salesforce Commerce Cloud, including a number of features to improve the shopping experience

Cuisinart®

THE RESULTS

- + Cuisinart Canada's new website includes a feature for finding spare parts, as well as integrations for enterprise resource planning (SAP), email services (Silverpop), payment processing (Paymetric), shipping (Canada Post), and product ratings and reviews (BazaarVoice)
- + Now Canadian customers can find the refurbished products and parts they need to "Savor the Good Life"

Fueling Loyalty

Pilot Flying J and DEG, an Isobar Company collaborated to implement and integrate SessionM with Salesforce Marketing Cloud to grow the brand's new tiered-point accrual loyalty program.

KEY HIGHLIGHTS

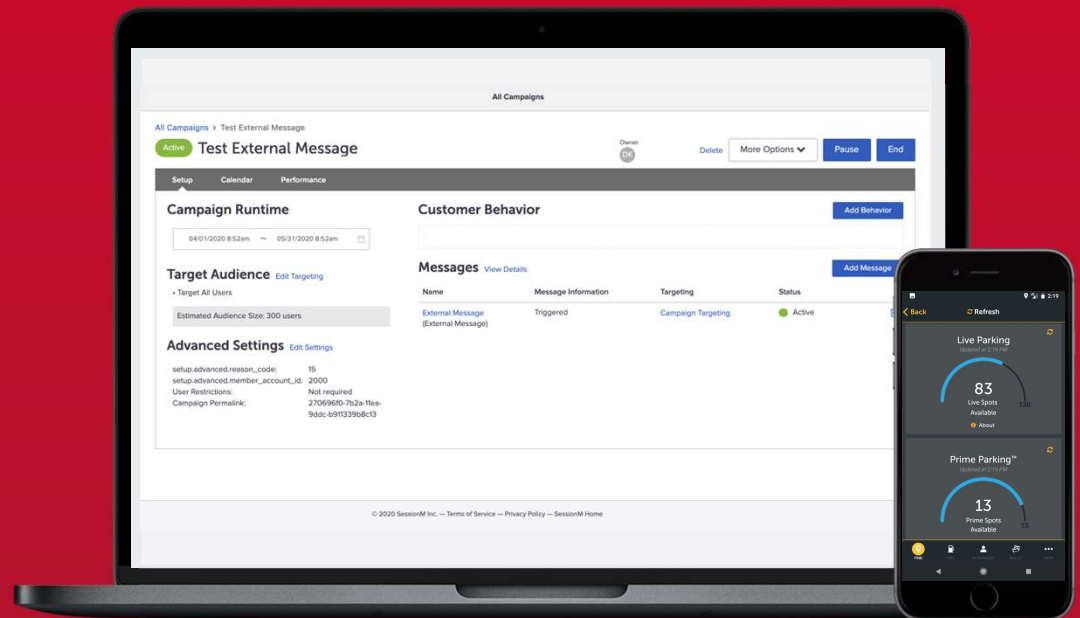

- + DEG implemented SessionM, set up campaigns, and integrated it with Marketing Cloud
- + DEG developed email journeys for all program tiers

THE RESULTS

- + Pilot Flying J launched the new program in April with DEG deploying emails to professional drivers, encouraging opt-ins and fill-ups
- + During the first campaign, 65% of all opted-in individuals actively participated and completed a qualifying fill-up to get to the next tier of the program

Experience Optimization

- + Experience optimization is our scalable process for uncovering areas of improvement from analysis, and a systematic method of testing hypotheses against those ideas.
- + From testing, we begin to form a customer theory, which is used to create a strategic roadmap to achieve the right message to the right person at the right time.

PROPRIETARY AND CONFIDENTIAL

TESTING IS ABOUT LEARNING WHAT WORKS AND WHY

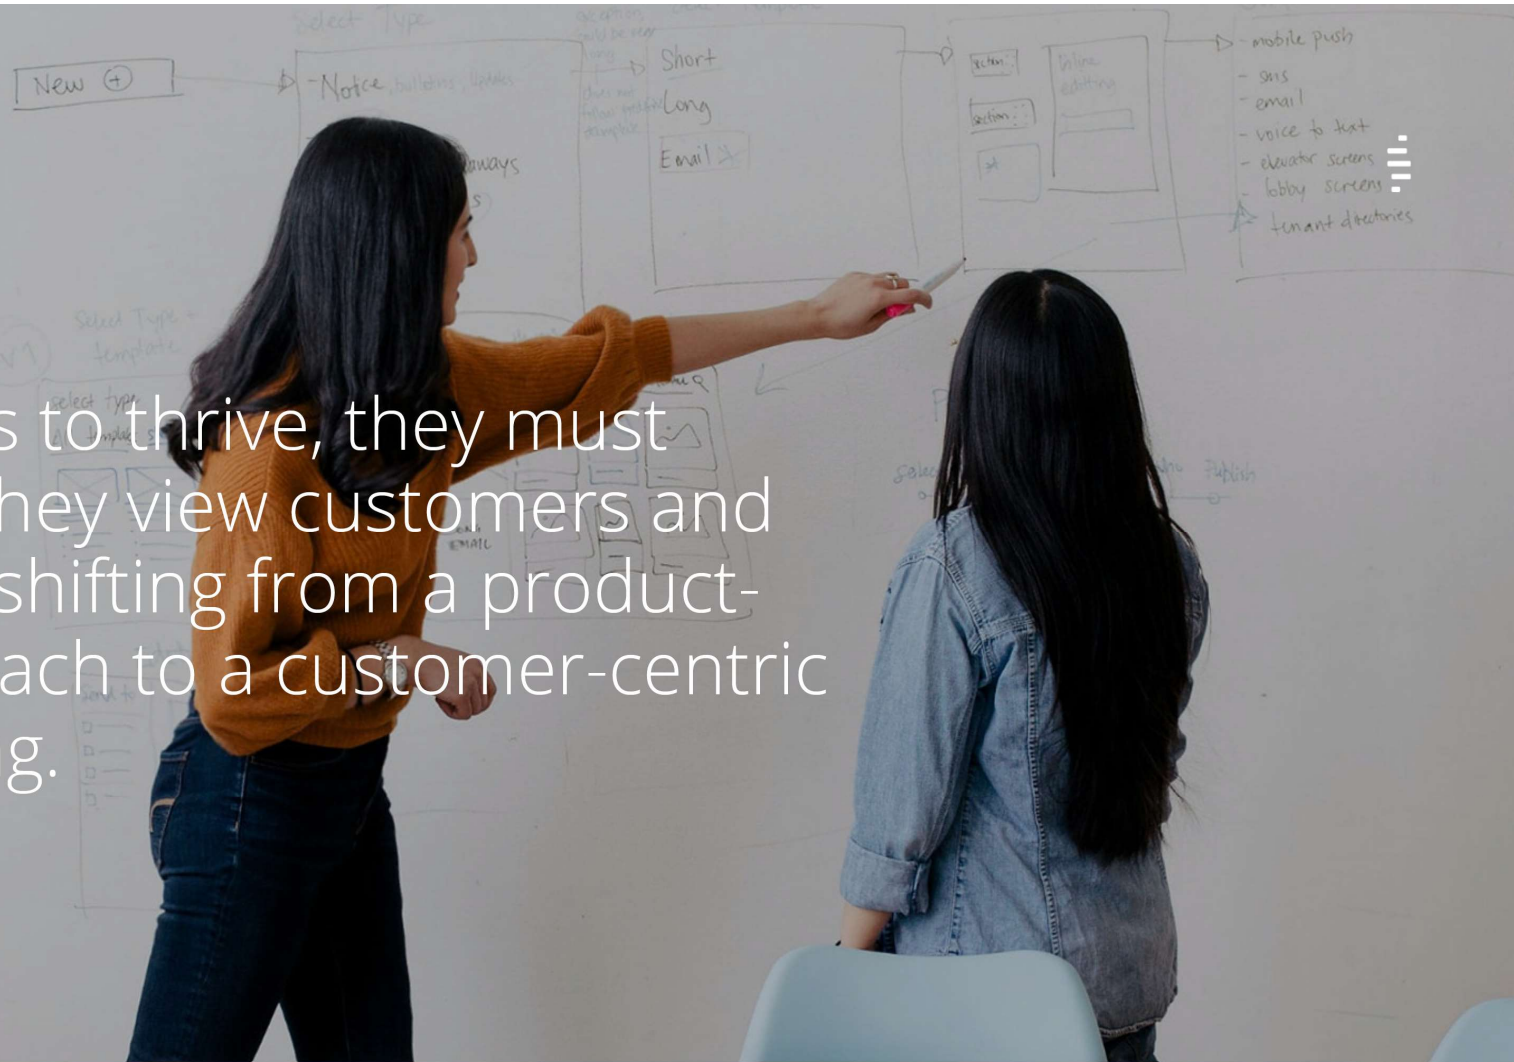

Providing a structured environment for people to discover tactics that will lead to a better understanding of their audience, content, and campaigns.

Customer Centricity

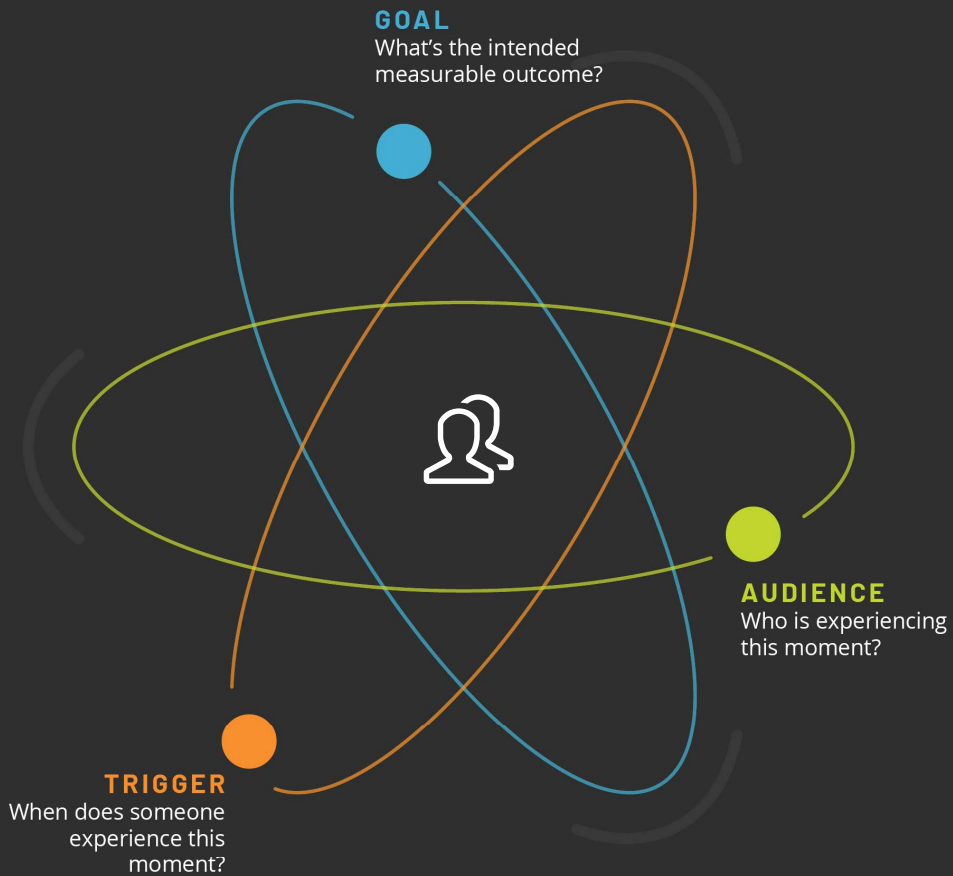

For marketers to thrive, they must rethink how they view customers and experiences, shifting from a product-centric approach to a customer-centric way of working.

Nearly two-thirds of marketers say being customer-centric is most important in establishing a digitally native culture.

Source: Econsultancy, *Effective Leadership in the Digital Age*, Dec. 2019

We believe moments are the new atomic unit of marketing

With funnels becoming shorter, customer experiences are being built around a collection of interchangeable, contextual, and non-sequential moments.

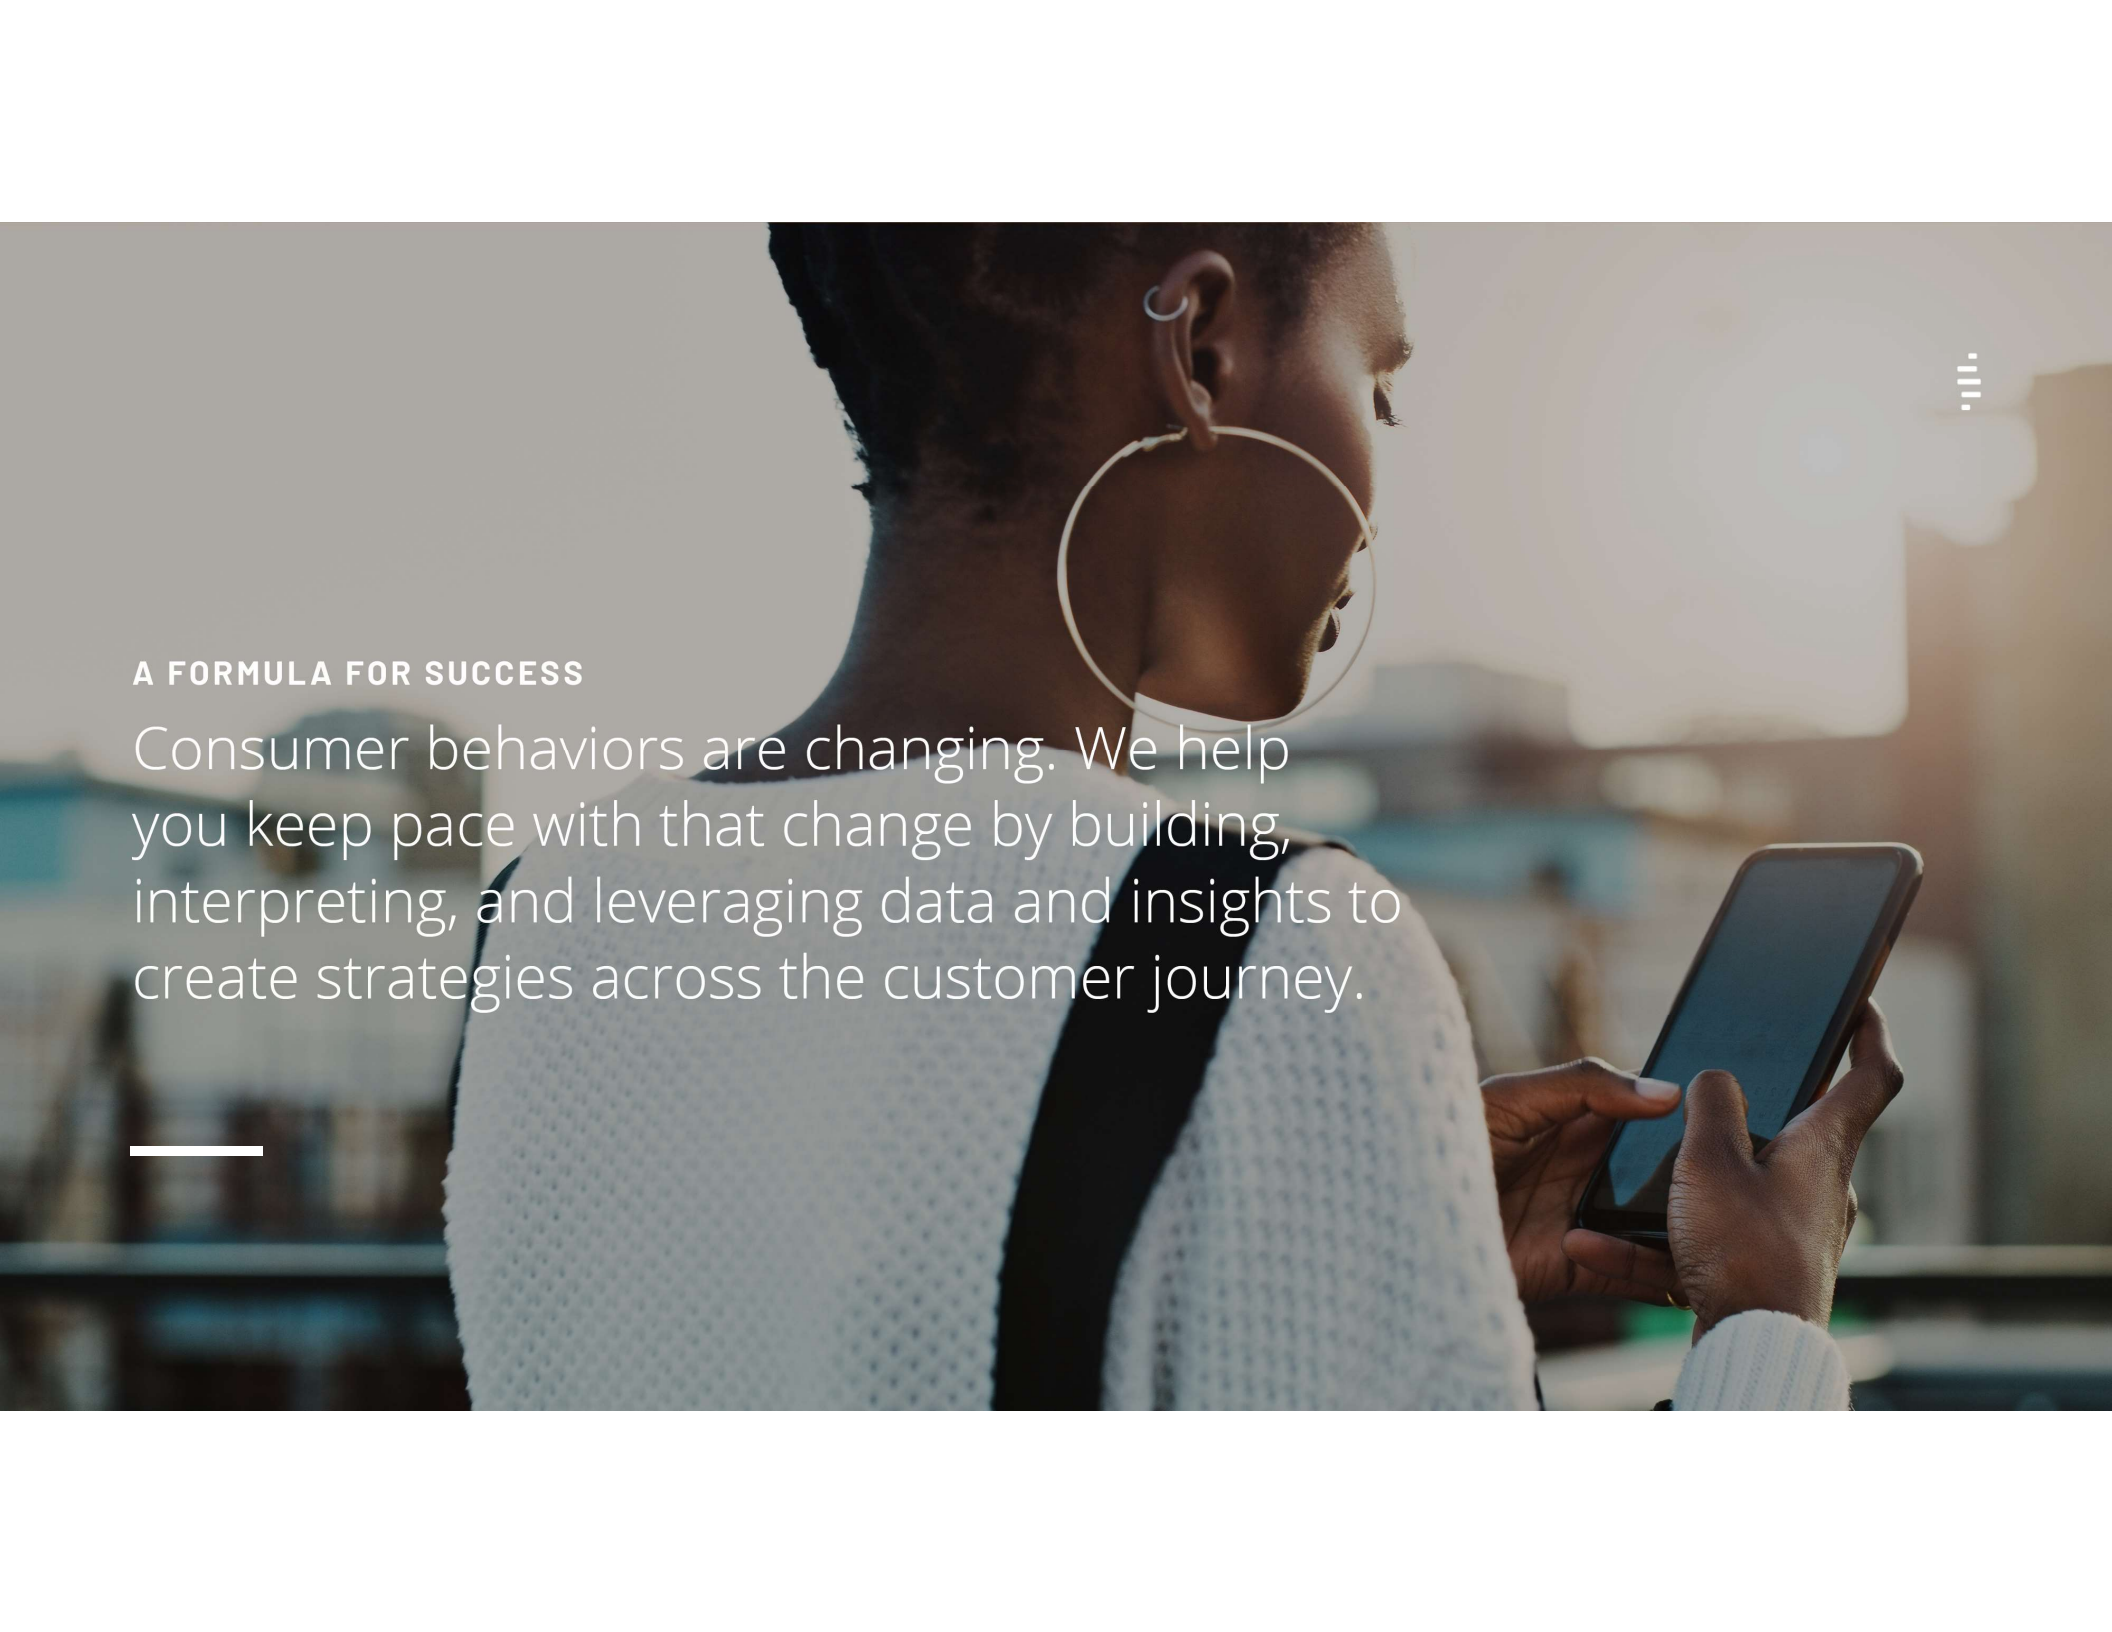

THE POWER OF CLV

CLV can be used across the customer journey to **create and manage a portfolio of customers as an asset.**

The result is a move from being descriptive to the crucial step of being predictive, where brands can anticipate what customers will do next and when.

A woman with short dark hair and large hoop earrings is shown from the side, looking down at a smartphone she is holding. She is wearing a white textured sweater. The background is a blurred cityscape with buildings and a bright light source, possibly the sun, creating a warm, golden-hour atmosphere. In the top right corner, there is a small icon consisting of three vertical bars of increasing height. In the bottom left corner, there is a short horizontal white line.

A FORMULA FOR SUCCESS

Consumer behaviors are changing. We help you keep pace with that change by building, interpreting, and leveraging data and insights to create strategies across the customer journey.

Analytics Delivery

+

Analytics Team

- + **Overall campaign performance metrics and trends** (revenue, opens, clicks, page views, disaffection rate, etc.)
- + Performance metrics and trends **by segment or customer cohort**
- + **Revenue attribution at individual level** for deeper insight development
- + Campaign **optimization analysis by segment or cohort** (optimal send time, frequency, offer strategy, etc.)

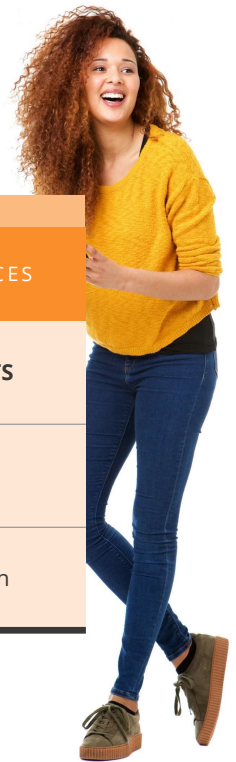

Moments are DEG's atomic unit for experience planning

Moving from one aggregate customer journey to thousands of journeys that feels like a cohesive experience requires a new approach to designing creative briefs and creating content.

Instead of prioritizing episodic campaign content, marketers are moving to a "moment-orientation," by building winning experiences around a collection of interchangeable, contextual, non-sequential moments.

	THEN	NOW	NEXT
	TOUCHPOINTS	JOURNEYS	EXPERIENCES
ORIENTATION	Campaigns	Channels	MOMENTS
PLANNING CYCLE	Ad Hoc	Sequential	Iterative
EXECUTION	Episodic	Cross-Channel	Always On

Regardless of the context, every moment has **three core elements**

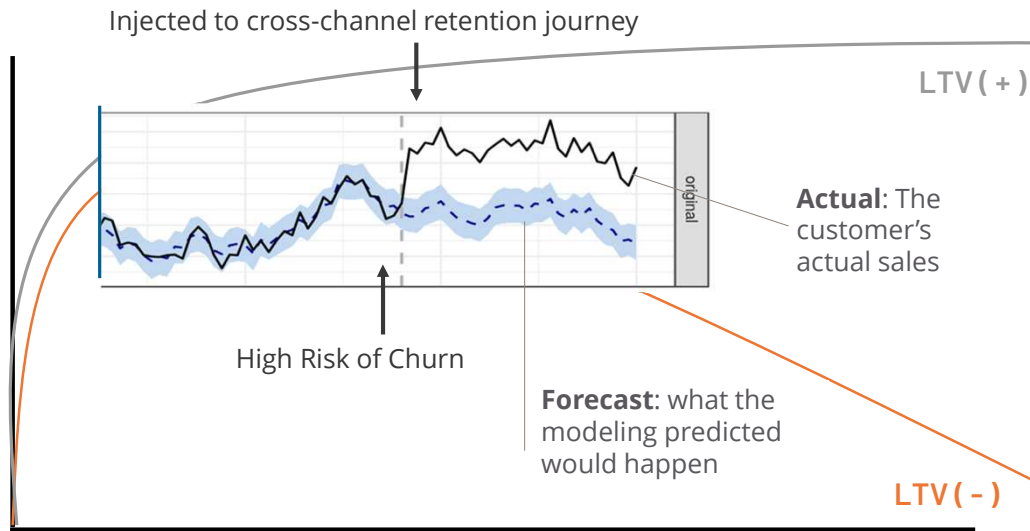

Marketers must move beyond traditional campaign-based execution models and meet customers at the time and places that matter to them most. Moment mapping is the only true way to do this in an adaptive way.

THREE ELEMENTS FOR IMPLEMENTING A MOMENT-ORIENTED EXPERIENCE

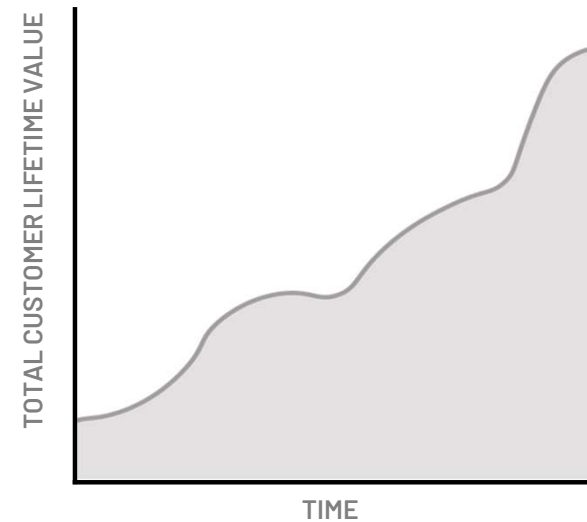

Moment mapping yields massive growth in customer asset value

INDIVIDUAL INTERVENTIONS LEAD TO...

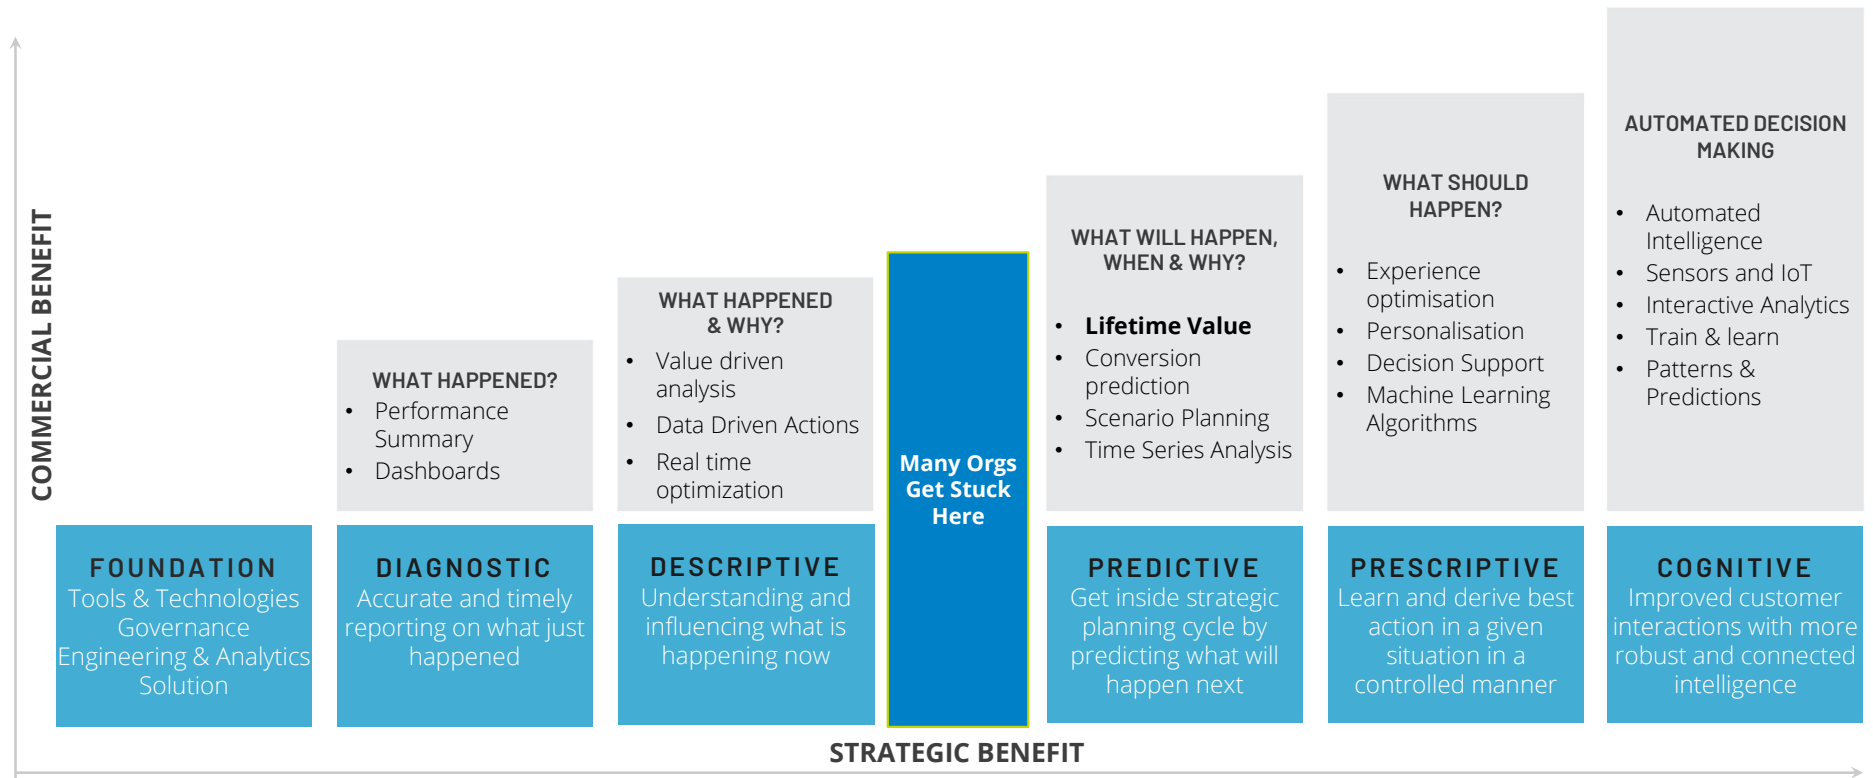

Note: actual client results

...CUMULATIVE CUSTOMER "ASSET" GROWTH

CLV bridges a critical gap in many organizations

Customer lifetime value reveals important attributes

CATEGORY	VALUE	SOURCE	CORRELATION	eCLV EFFECT SIZE
Demographic	Female	SFMC Preference Center	Positive	Medium \$\$\$
Demographic	Age: 24-35	SFMC Preference Center	Positive	Large \$\$\$\$
Attitudinal	Eco-friendly	DMP	Negative	Small \$\$
Attitudinal	Family focused	Survey	Positive	X-Small \$
Behavioral	Exposed to 3-5 display ads last 30 days	DMP	Positive	Medium \$\$\$
Behavioral	No email opens last week	SFMC	Negative	Large \$\$\$\$
Behavioral	Click-through from Pinterest	DMP	Positive	X-Large \$\$\$\$\$
Behavioral	Purchase last 180 days	SFCC	Positive	Large \$\$\$\$
Behavioral	Active service case	Service Cloud	Negative	Medium \$\$\$

Yet, there are two distinct bottlenecks on the path to personalization

DATA

Managing Customers as an Asset

Leveraging Customer Value (ideally CLV) to build customer equity, retain high-value customers, and acquire new customers with similar high-value attributes. Third party data enrichment ensures marketers have a complete view of each segment.

DYNAMIC CONTENT

Moments at the Atomic Unit

Establishing a framework for developing contextually relevant content designed to win in critical moments in the customer journey. Content is informed by customer equity and value measures, developed knowing the context, trigger, available audience data, and goal for each moment.

ALWAYS ON

Orchestrating experiences

Building a system for personalization at scale. Ensuring every customer interaction is aligned to a customer lifecycle and assigned to a scored audience segment. Orchestrating personalized experiences to manage next best communications.

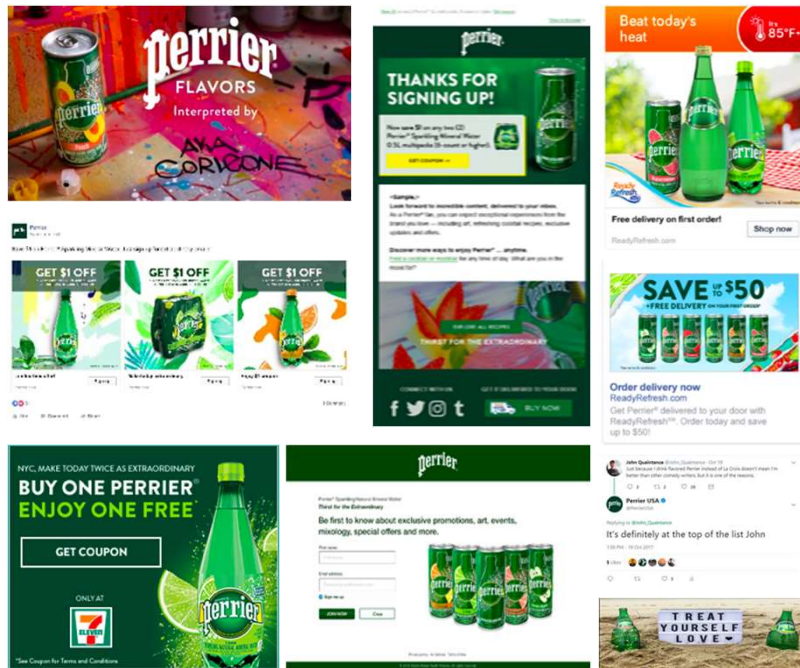

BOTTLENECK #1: "Creative without Context"

Brands lack a unique perspective on hundreds or thousands of unique message variations, falling back to demographics / psychographic segmentation in the creative briefing process. A starting point, but creative teams must be guided into designing for people, not just "busy moms" or "urban elites."

BOTTLENECK #2: "Assembly & Distribution"

Dynamic content production and distribution requires a new journey mindset driven by interlocking moments. Experiences need to be delivered in non-traditional non-sequential journeys and provide consumers increasingly personalized experiences, while brands acquire more first-party data via engagement.

Personalization at scale requires a holistic approach

JOURNEYS:

30x Journeys

CONTENT:

4x Digital Channels

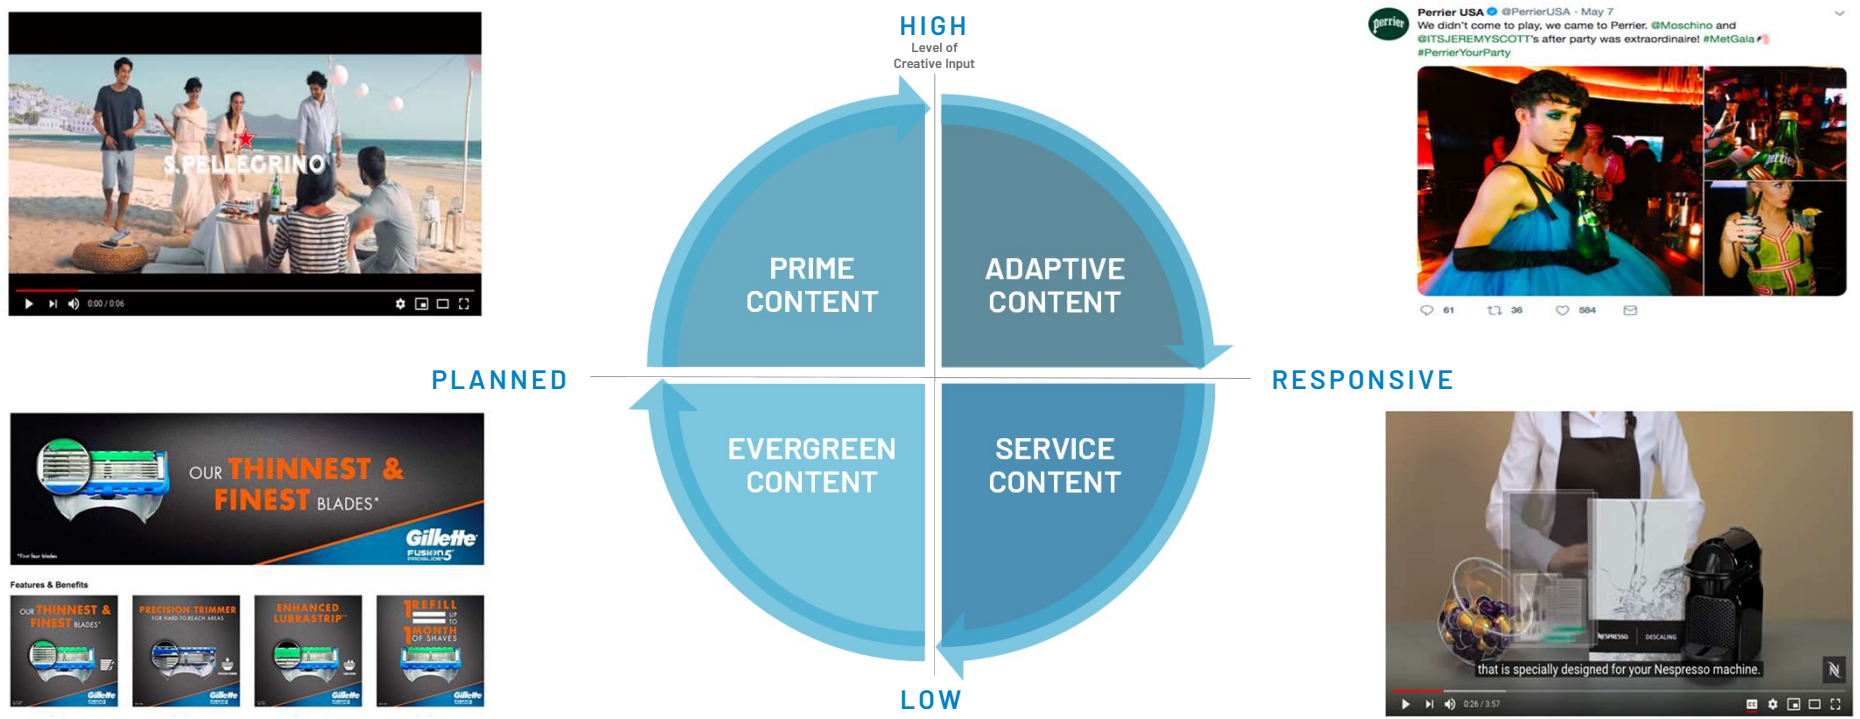

DATA:

6x Audience Segments

720 unique variations

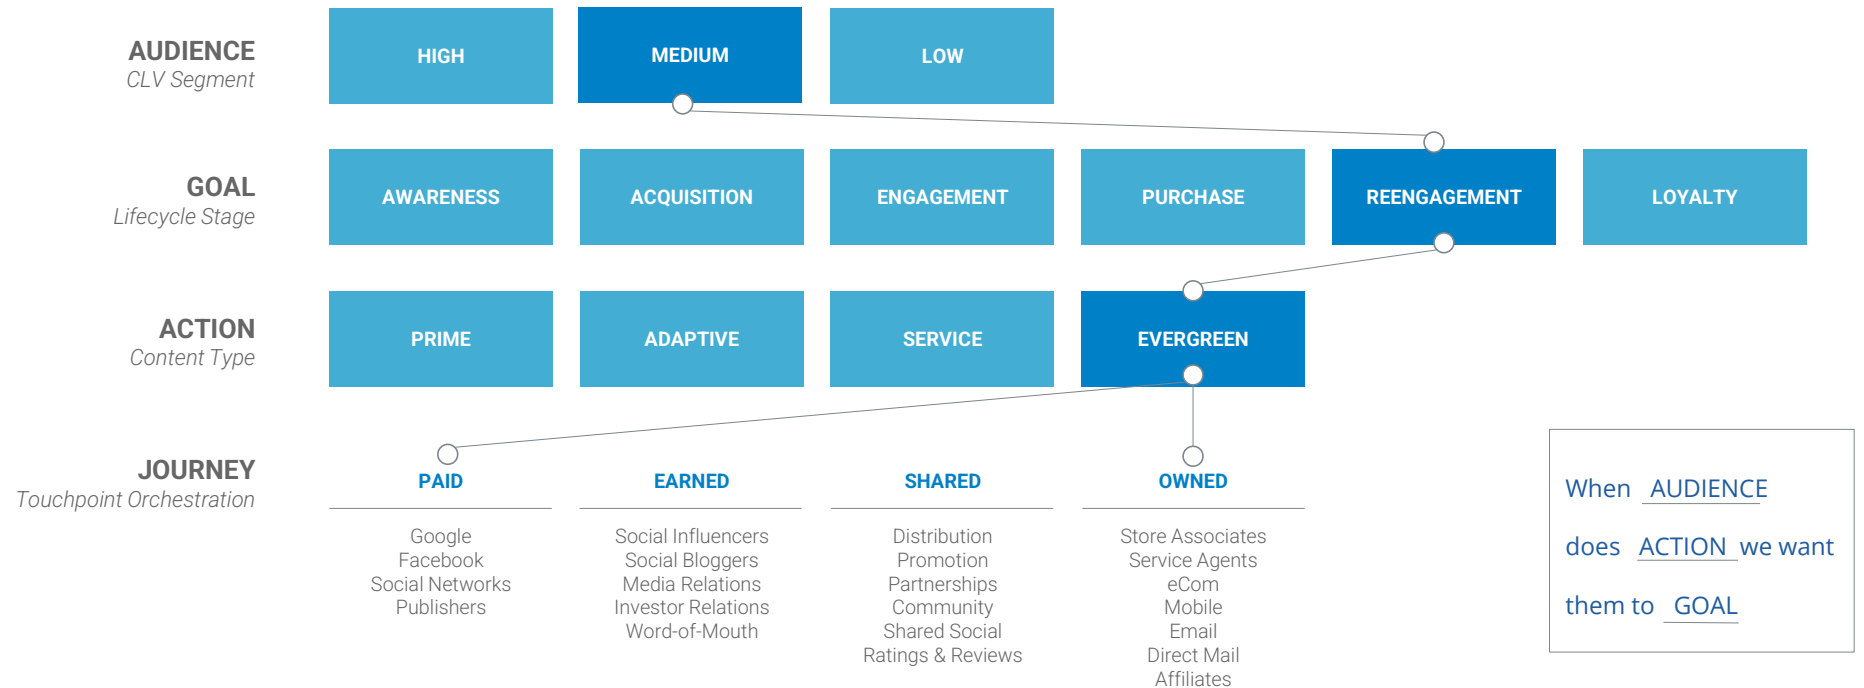

Action oriented content operating model

Assembly frameworks complete the picture

THE OPERATING MODEL BECOMES BACKBONE OF REAL-TIME DECISIONING AND PERSONALIZATION AT SCALE

Salesforce Product Implementations

SFMC Configuration and Migration: Business Impact

NOW

- + All triggered and promotional emails deployed out of SFMC 2.0 allows NBC a chance to leverage enhanced features and functionality

NEAR

- + Opportunity to optimize content and journeys will drive a customize and enhanced customer experience, resulting in additional revenue

FUTURE

- + Implementation of Einstein will allow for PI to upsell and cross sell products, toppers, and any additional products

Journey Builder: Business Impact

NOW

- + Determine journeys and automations that make sense for the NBC customer and NBC business
 - + Implement multiple journeys using Journey Builder to more easily adapt the user experience mid-stream
 - + Engagement splits, resends to non-openers, and other tactics will drive engagement
-

NEAR

- + Multiple journeys allows us to more effectively leverage SFMC activities, such as Einstein Engagement Splits to alter path based on engagement
 - + Send Time Optimization to deliver the message at the best time for the individual, and the expansion to multi-channels, such as SMS, mobile push, social and direct mail.
 - + Integration with Ad Studio
-

FUTURE

- + With multiple journeys, effectively market to the moment leveraging segmentation to dictate channel preference and dynamic content on a 1:1 level.
 - + More effectively test using Path Optimizer journey activities for efficient A/B testing throughout the journey duration.
 - + Continue to leverage Journey Builder to facilitate more complex segmentation and proactive communications
-

Ad Studio: Business Impact

NOW

NEAR

- + Ad audience can be created to push audience to social channels for paid retargeting to encourage omnichannel messaging

REPUTATION

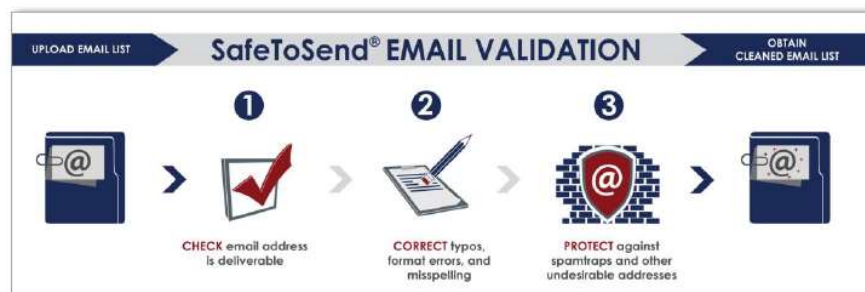

- + Having a poor-quality email list can hamper your email reputation.
 - + Unless the subscribers receive your email in their inbox, your email strategy will be futile.
 - + A bad reputation can deter your engagement with subscribers and affect the conversion rate as well
-

PROGRAM COST

- + As the size of your email list grows, it considerably increases the cost of email marketing.
 - + Removal of inactive or invalid email addresses and maintaining email list hygiene can help you cut down on the marketing expenses.
-

SPAM TRAPS

- + ISPs keep a close eye on email senders who use spam traps to reach the subscribers.
 - + These spam traps are, in fact, email addresses owned by ISPs and the blacklist providers in order to check that the email marketers are abiding by the best practices.
-

CHECK

- + Determine whether the address syntax conforms to RFC and FreshAddress standards.
- + Confirm that domains and MX records are valid and can accept mail.
- + Ensure address meets ISP-specific requirements.
- + Verify the account is linked to an actual working mailbox.

CORRECT

- + Misplaced or transposed @ signs and invalid characters such as spaces or quotes.
- + Typos in both TLD's (.com, .net, .edu, etc.) and LLD's (gmail, aol, Hotmail, etc.)
- + ANY misspelled domain, not just the most popular ones.
- + Uncommon domain entries (such as @google.com instead of @gmail.com).

PROTECT

- + Toxic: Spamtraps and honeypots
- + Undesirable: Frequent complainers, role accounts, disposable domains, fictitious and malicious email addresses, client-specific suppressions.
- + Not best-practice: DMA "Do Not Email List" and FCC wireless domains

Fresh Address File Instructions

FILE FORMAT

- + Create one file* of your entire list of email addresses.
- + Format the list as a tab delimited text file (*.txt) with a header row. Please do not include quotes or other text qualifiers. The following fields are required unless otherwise noted:

UNIQUE-ID

EMAIL ADDRESS

FILE CONTENTS & NAMING

- + Your input file should not contain any unnecessary sensitive information of any kind, such as social security numbers, credit card numbers, financial information, birth dates and medical information. Files that contain any such data will be destroyed upon receipt.
- + You are welcome to use a file name of your choosing, however referencing the quantity of records will be helpful for our team's QC of your data file
