

Dashboards...are not analysis

Analysis transforms raw data into **actionable insights** and business **recommendations** that have a demonstrable, tangible impact on our client's **bottom line**.

Analysis starts with a question.

The result:
continual growth

One question leading to the next...

PROPRIETARY AND CONFIDENTIAL

(2022) Phase 4: Future Proofing

PATH TO VALUE MAP

Customer lifetime value is the leading customer- centric metric

Successful brands are moving away from outdated, demographic-based segmentation and toward more individualized predictions of customer value derived from historical purchase data.

CLV models alone only get you so far

CLV has evolved from being hard to calculate to driving individual scores that influence personalized messages. We understand purchase behavior at a singular level and use that insight to activate moments across the customer journey.

Purchase prediction

When is the next purchase expected?

Lifetime

When is the next purchase expected?

MYTH #1

Demographic-based cohorts

- + A heuristic summary derived from thousands or millions of people
- + Segment limited by observable demographic attributes: “busy moms,” “men ages 24-35”

PROPRIETARY AND CONFIDENTIAL

“Millennial Mark”

HHI >\$85,000

No kids

Likes action movies

MYTH #1

CLV-driven cohorts

- + Derived from historical purchase data and applied to individual-level predictions
- + Segmented by forecast value to the business: high, medium, low CLVs

PROPRIETARY AND CONFIDENTIAL

CLV allows marketers to manage customers as an asset

Balancing the Allocation of CLV Cohorts

CLV in action

Our models allow us to proactively engage on a 1:1 level at critical moments—limiting churn and yielding massive growth in customer-asset value.

Individual Interventions lead to...

...Cumulative Customer "Asset" Growth
